

# City of Santa Fe, New Mexico

# memo

**DATE:** May 12, 2014

**TO:** Public Safety Committee Members  
Finance Committee Members  
City Council Members

**FROM:** Greg Gallegos, Wildland Superintendent

**SUBJECT:** Approval of Energy Minerals and Natural Resources Department (EMNRD) Contract No. 11-521-2301-0051

**VIA:** Erik Litzenberg, Fire Chief

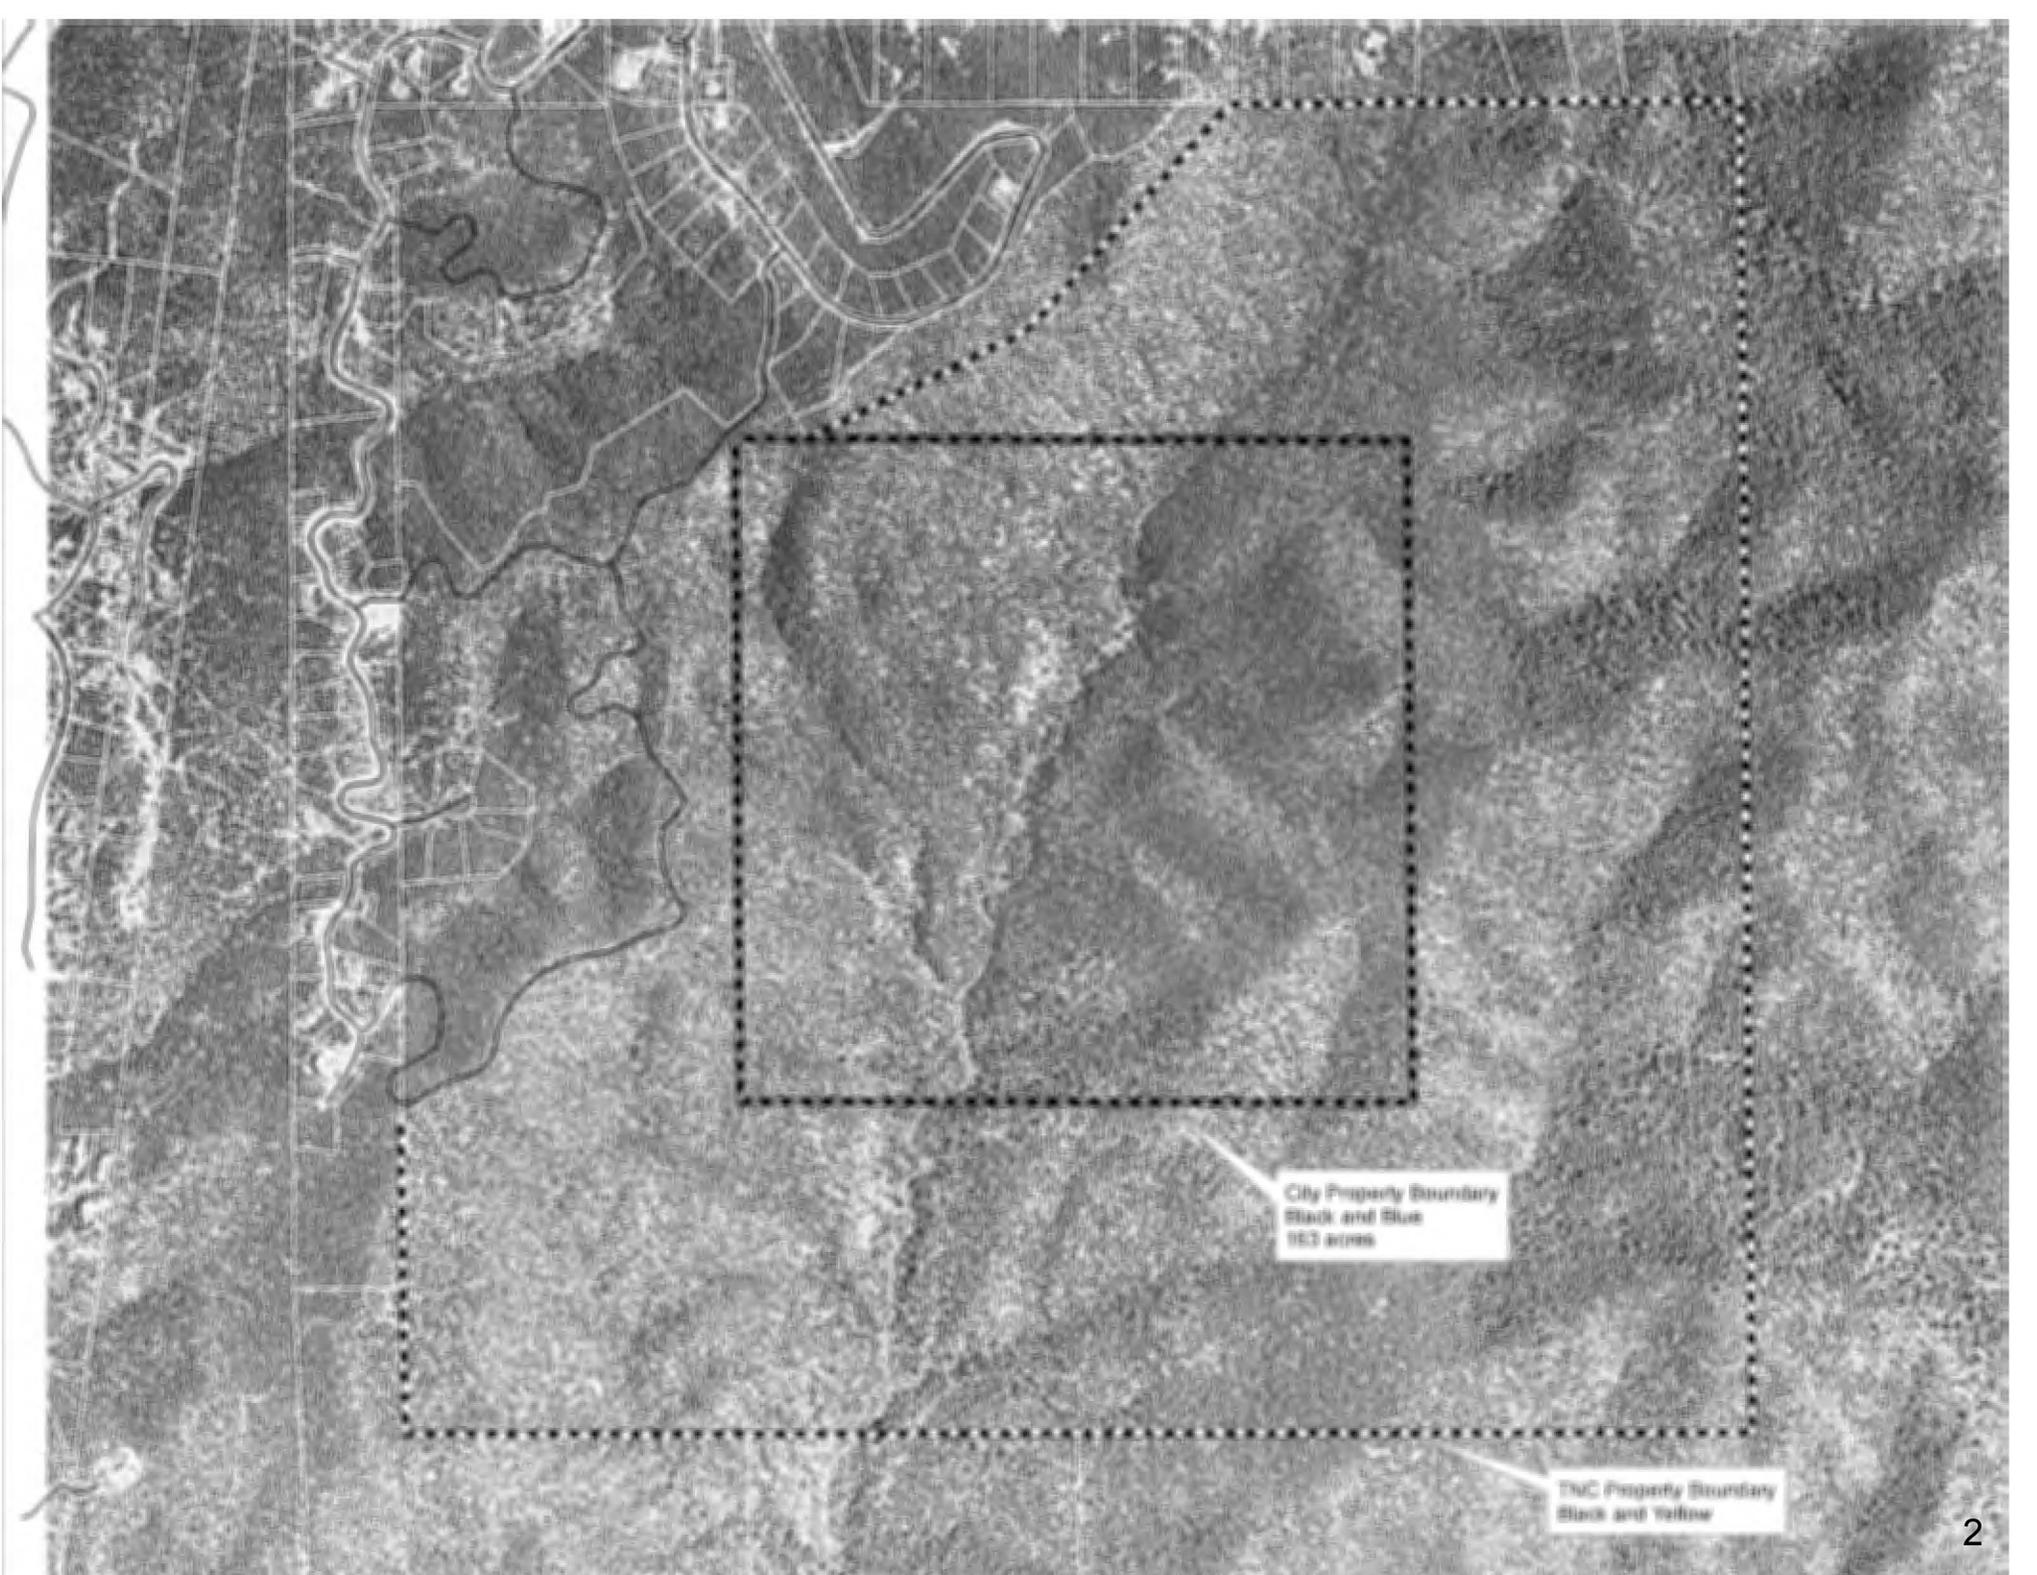

The City of Santa Fe Fire Department was awarded a hazardous fuel reduction thinning contract from ENMRD to conduct fuels reduction on 30 acres of City property located in a forested canyon with Aztec Springs Creek running through the center. The canyon is located north of Two Mile Reservoir, following Aztec Springs Creek from where it feeds into the reservoir. The total amount of the contract is \$68,250 and will be used to fund the Fire Department wildland handcrew to conduct the fuels reduction at no additional cost required from the City.

**Attachments:**

Map location of thinning project in Aztec Springs.

**Action:**

It is requested that EMNRD Contract # 11-521-2301-0051 in the total amount of \$68,250 be approved by City Council and used to fund the Fire Department wildland handcrew to conduct the fuel reduction on 30 acres of City property located in the Aztec Springs Drainage.

**Grant Programs Project Work Plan for:**

**City of Santa Fe (Contractor)**

**Project Number: 14-06-1207**

**Project I.D. Funding: 2013 Severance Tax Project (A131418)**

**Contractor Type: N/A**

**Forestry Division Project Manager: George Smithson**

Project Title: **Aztec Springs Fuels Reduction Project**

Project Coordinator: Greg Gallegos, Santa Fe FD Wildland Superintendent

Address: P.O. Box 909, 200 Lincoln Ave.

Santa Fe, NM 87504

Telephone Number: 505 955-3120 email: gdgallegos@santafenm.gov

**NOTE: All projects shall comply with 19.20.4.9 NMAC.**

**The Energy, Minerals and Natural Resources Department (EMNRD), Forestry Division (Forestry Division) may extend task due dates by written notice to the Contractor as long as the Forestry Division is satisfied that sufficient progress is being made. Any other changes shall require a written amendment to the work plan, approved by the Forestry Division Director or designee, following EMNRD contract review.**

**I. PROJECT DESCRIPTION:** Explain the type of project(s) to be implemented, location(s) of areas to be treated, what is being threatened, and how threat to areas will be mitigated, etc.

This project involves fuels reduction by cutting, chipping, and removal of forest species (piñon, juniper, and ponderosa pine) on 30 acres on Contractor's property.

Location: Forested canyon with Aztec Springs Creek running through the center. The canyon is located north of Two Mile Reservoir, following Aztec Springs Creek from where it feeds into the reservoir. The treatment area is located 3.4 miles east-northeast

Due to on-going drought conditions, public use, and the adjacent wildland urban interface, this area has been a concern for the possibility of wildfire in the dense over growth. Removal of excessive fuels from this area will greatly reduce the possibility of a catastrophic wildfire in this area and enhance and help the recovery of both native plant species and wildlife to the area.

**II. PROJECT OBJECTIVES:** Identify activities to be conducted under the scope of this project.

This project's objective is to reduce the hazardous fuels levels occurring on the Contractor's property surrounding Aztec Springs. This project will focus on targeted removal of excess over story trees, such as piñon, juniper, and ponderosa pine. Ladder fuels will be removed, continuity of vertical and horizontal fuels will be reduced, and the canopy base height will be raised. Clumps and stringers of ponderosa pine should have all encroaching trees removed to within 25 feet of the drip line of the trees. In places of ponderosa dominance, a basal area range of 50-80 ft<sup>2</sup>/ac is required, with a target basal area of 60 ft<sup>2</sup>/ac. In areas of piñon-juniper dominance, the basal area range shall be between 30-60 ft<sup>2</sup>/ac, target 40 ft<sup>2</sup>/ac. The retained ratio of piñon and juniper shall mimic what naturally occurred.

Individual tree selection shall result in groups of residual trees interspersed by open areas.

Contractor's fuels and fire management hand crew will use hand falling for tree removal. Contractor will pile slash in accordance with 19.20.4.9 NMAC. Slash piles will be burned within one calendar year of completion of thinning activities.

**III. CONTRIBUTORS:** List the private, local, tribal, state, or federal organizations that are contributing or participating in project implementation.

- Forestry Division – technical assistance.
- Santa Fe Fire Department – providing operators to complete project.

**IV. BUDGET:**

**NOTE: If you are requiring the Contractor to thin a mandatory number of acres in Sections I or II, make sure that the number of acres required multiplied by the highest thinning rate does not exceed the total amount available for Contractual Services for Thinning.**

**PROJECT REVENUE**

Unless the Forestry Division authorizes otherwise, in writing, Contractor is not required to provide non-federal match, either cash or in-kind services, as specified below in the "Contractor" column. (See Exhibit 1, In-Kind Match or Landowner Reimbursement, for acceptable types of match.) Use extreme care in calculating the number of acres to be thinned. EMNRD can only reimburse for the amount specified in the rates for which EMNRD will reimburse per acre and the total amount reimbursed for this project cannot exceed the amount in the Grant Column for Contractual Services for Thinning.

CONTRIBUTORS	GRANT	CONTRACTOR	TOTAL
Dollars	\$68,250.00	\$	\$68,250.00
In-Kind Match	\$		
Total	\$68,250.00		\$68,250.00

of daily treatments, and production rates.

Throughout project Contractor submits invoices to Forestry Division for reimbursement.  
June 30, 2017 Forestry Division and Contractor conduct final project inspections.  
June 30, 2017 Contractor submits final invoice.

**VI. SITE SELECTION:** What are the overall project boundaries, how were they selected, when, and by whom? Within the project boundary, how will specific projects be prioritized?

The work involved in this proposal covers a large fuels treatment area to be installed in the Aztec Springs area. The project area is 160 acres of canyon surrounding Aztec Springs Creek. The project area is one mile north of Two Mile Reservoir. The acreage of the treatment will total 30 acres. From the center of Aztec Springs Creek, a 100-foot buffer shall be marked and thinned on both sides of the canyon (totaling 15 acres). In addition to this area, an additional 15 acres will be thinned in the canyon, to meet fuels reduction objectives.

**VII. ENVIRONMENTAL CLEARANCES:** Who will obtain any necessary environmental clearances for the project area and how will this be done?

The Contractor shall assist the Forestry Division in complying with the New Mexico Cultural Properties Act, NMSA, 1978, § 18-6-8.1 if there are any sites that are registered cultural properties and will be affected.

The Contractor shall notify the Forestry Division prior to beginning treatment on selected property, so that the Forestry Division may verify through the Archeological Records Management Section (ARMS) if there are any sites that may require protection.

If the treatment may affect a registered cultural property, the Forestry Division shall afford the State Historic Preservation Officer a reasonable and timely opportunity in planning such undertaking as required by NMSA 1978, § 18-6-8.1.

**VIII. PROJECT PROCEDURES:** Identify the steps and activities to achieve the objectives. As an example, the steps should include, at a minimum, the assessment of the property, landowner's submittal of request for assistance, field inspections and priority ranking, completion of work on property, and final inspection and payments and reimbursement steps.

- A. Contractor and Forestry Division staff prioritize project areas of concern.
- B. Forestry Division and Contractor agree upon procedures for successful project completion.
- C. Forestry Division conducts field inspections at least three times a month while thinning is ongoing.
- D. Forestry Division and Contractor complete project reports and financial documentation as needed.

**IX. LANDOWNER REQUEST FOR ASSISTANCE:** Contractor shall use the attached form Landowner Request for Assistance (Exhibit 2), to document a landowner's request for assistance from the Contractor. (**Mandatory:** *District must have documentation that landowner has requested assistance and must be attached*)

**Does not apply to this work plan.**

**X. LANDOWNER AGREEMENTS:** Contractor shall develop a landowner agreement that defines the relationship and responsibilities between Contractor and landowner during the project. The agreement should include a description of the property to be treated, landowner responsibilities, and permission to enter the property to conduct and inspect the project. This agreement shall be included in the project file and available to EMNRD for review.

**Does not apply to this work plan.**

**XI. LANDOWNER PRACTICE PLAN:** Contractor shall use the attached form Landowner Practice Plan (Exhibit 3), or a close proximity thereof, to document the landowner's objectives and responsibilities, the property condition, and recommended treatments. If the Contractor deviates from this form, it shall first get EMNRD's written approval. (**Mandatory:** *There must be documentation of proposed treatment.*)

**Does not apply to this work plan.**

**XII. PURCHASING METHODOLOGY FOR PROJECT:** This project shall follow all procedures outlined in the New Mexico State Procurement Code.

**XIII. PRIOR APPROVAL FOR ALL SUBCONTRACTS:** Contractor shall provide EMNRD all necessary information in a timely fashion for prior approval of all subcontracting to occur with this project.

**XIV. BILLING INSTRUCTIONS:** Contractor may invoice EMNRD for this project every three acres, or no more frequently than monthly. **Contractor shall not bill administrative costs for Contractual Services.**

**XV. PAYMENT TRACKING:** Contractor shall maintain a budget in a spreadsheet format and provide updated copies to EMNRD on a monthly basis. At a minimum, the spreadsheet shall list the following:

- Work approved date
- Invoice date
- Amount paid
- In-kind
- Acres treated

**XVI. REPORTING:** Contractor shall submit progress reports to EMNRD with each billing. Progress reports shall include the number of acres thinned.

**XVII. CLOSE OUT:** Contractor shall submit a final project file package to ENMRD when all is finished, all financial transactions are completed, and the Forestry Division accepts the work.

**XVIII. INSPECTIONS AND CERTIFICATION:** Contractor shall use the attached form **Wildfire Mitigation Inspection (Exhibit 4)** to document project completion. If the Contractor deviates from this form, it shall first get EMNRD's written approval of the changes. (**Mandatory: Contractor shall use the attached form.**)

**XIX. DOCUMENTATION OF MATCH:** If applicable, include a statement of how this will be performed. Contractor shall use the attached form **Volunteer Sign-Up Sheet (Exhibit 5)**, or a close proximity thereof, to document in-kind contributions. The value of Volunteer time is **\$21.60 per hour** (based on the Bureau of Labor Statistics).

**Does not apply to this work plan.**

**XX. CERTIFICATE OF PAYMENT:** Contractor shall also use the attached form **Certificate for Payment (Exhibit 6)** when requesting reimbursement from EMNRD and shall include certified invoices and volunteer match forms. (**Mandatory: Contractor shall use the attached form.**)

**XXI. INVOICE PACKAGE:** Contractor must submit the following documentation with each invoice: invoices from subcontractors or landowners, inspection report, certificate of payment, documentation of match (see Exhibit 6 for acceptable documentation), and a written narrative progress report (can be the narrative provided on the inspection report).

**Does not apply to this workplan.**

**XXII. SUBRECIPIENTS REQUIREMENTS: Does not apply to this work plan.** Contractor has been determined to be a sub recipient and is therefore notified that the following federal regulations are applicable to funding CFDA (enter title and number, award name and number, and award year.) Contractor shall comply with all applicable state and federal statutes and rules or regulations imposed as a consequence of funding pursuant to this agreement. Contractor shall permit the Forestry Division, U.S. Forest Service and auditors to have access to the records and financial statements as necessary for Forestry Division to comply with this part.

If any part of this Agreement is funded pursuant to federal funds that is equal to or greater than \$25,000, Contractor agrees to abide by the reporting requirements of the Federal Funding Accountability and Transparency Act (FFATA), as amended. Information from these reports will be made available to the public. Receipt of funds pursuant to FFATA is expressly contingent upon Contractor's agreement that it shall fully comply with the reporting requirements specified by the Act. Contractor shall provide information required by the Federal Funding Accountability and Transparency Act of 2006 (P.L. 109-282) (FFATA), as that law may be amended or renumbered when registering for a DUNS number.

If Contractor receives more than \$500,000 in federal funds in the aggregate from any source in a fiscal year, Contractor's financial records involving services and procurement under this Agreement shall be audited annually pursuant to all federal, state and local government audit requirements and 2 C.F.R. Part 225 and the federal OMB Circular A-133, as prescribed by the Single Audit Act of 1984, or any subsequent OMB Circular. Contractor shall provide EMNRD

with a copy of the independent financial audit, either in hard copy format or on disk, no more than 45 days after the audit's completion for each fiscal year this Agreement is in effect.

Contractor is subject to the terms and conditions herein, except with respect to the Contractor's OMB Uniform Administrative Requirements and Cost Principles. The Contractor is subject to the following:

SUBGRANTEE TYPE	APPLICABLE ADMINISTRATIVE REQUIREMENTS AND COST PRINCIPLES	
	ADMINISTRATIVE REQUIREMENTS	COST PRINCIPLES

Exhibit A – Costs that can be used as in-kind match or landowner reimbursement

Federal grant funds are governed by the cost principles of the Office of Management and Budget (OMB). Allowable costs are those costs identified in the relevant OMB circulars and in the grant program's authorizing legislation. To be allowable under Federal awards, costs must be reasonable, allocable, and necessary to the project, and they must also comply with the funding statute requirements.
