John Gallaher

Fernando Aranda

Subject:

Santa Fe Water Division 2008 Financial Plan

### I. Introduction

The City of Santa Fe Sangre de Cristo Water District (the City) serves approximately 32,000 water customers. The City's water operations are financially self-sufficient with funding for capital and operating requirements derived primarily from rates.

The City authorized Red Oak Consulting (Red Oak) to update its Financial Plan Model to assure that an adequate level of revenue from rates and charges are maintained to meet annual revenue requirements and provide adequate reserves. This study consisted of a computer based ten-year financial plan. It included the FY 2007-08 as the base year and FY 2008-09 through FY 2016-17 as the projected period. Only FY 2007-08 and forward is reflected in Exhibit 1 and accompanying tables.

## II. Study Assumptions

This rate study is based on numerous assumptions. Changes in the assumptions could have a material effect on study findings. Red Oak incorporated the following key assumptions into the study:

- Annual growth of 1.5%
- Annual inflation of 3.0% for O&M and 3.5% C1P
- 9 Year CIP of \$185,871,846
- Minimum Target Fund Balance of \$10M
- Debt Service Coverage Target of 1.5
- Bond issues assume 30 years @ 5.56%

# III. Summary of the Financial Plan

The main function of the financial plan is to balance sources of funds with uses of funds. Uses of funds include expenditures for operating expenses, repairs and replacements, debt service, increases in reserves, and cash-financed capital expenditures. Sources of

funds include revenues from water sales, miscellaneous fee revenue, interest/investment earnings, use of cash reserves, debt proceeds, and contributions (including grants, developer contributions, etc.). By identifying all of the planned uses of funds, we are able to develop a financial plan that balances the sources of funds in such a way as to minimize the impact on water rates as much as possible.

The financial plan is a forward-looking model, meaning that all of the values reported are for future periods. For the purposes of this update, the first year in the model is FY 2007-08. The model includes projections of sources and uses of funds through the FY 2016-16. Exhibit 1 provides a brief summary of the more relevant results from the financial plan.

### IV. Findings

The 2007-08 financial plan as presented in the attachment will require the City to increase water rate revenues by 8.20 percent per year starting in fiscal year 2008-09 through fiscal year 2012-13.

The financial plan also calls for the deferral of a \$17.9 million inter-fund loan with the city, the approval of a \$9 million low interest rate loan and the issuance of \$34.5 million in revenue bonds in fiscal year 2009-10; \$20.6 million in fiscal year 2012-13 for a total of \$55.1 million over the study period.

This financial plan is reliant on the accuracy of information provided by the Water Division, and the assumptions made by Red Oak, the Water Division, and the City's financial advisory team. While we believe all of the information and assumptions accurately reflect the City's long-term plan, the City should understand that the results discussed in this memorandum may change if the underlying information and/or assumptions change, and such changes may be material.
