MINUTES OF THE CITY OF SANTA FE FINANCE COMMITTEE

Monday, October 21, 2013

1. CALL TO ORDER

A meeting of the City of Santa Fe Finance Committee was called to order by Acting Chair Patti J. Bushee, at approximately 5:00 p.m., on Monday, October 21, 2013, in the Council Chambers, City Hall, 200 Lincoln Avenue, Santa Fe, New Mexico. [Chair Carmichael A. Dominguez arrived later in the meeting and assumed the duties of the Chair.]

2. ROLL CALL

MEMBERS PRESENT:

Carmichael A. Dominguez, Chair Councilor Patti J. Bushee Councilor Christopher Calvert Councilor Bill Dimas

MEMBERS EXCUSED:

Councilor Peter N. Ives

OTHER COUNCILORS ATTENDING:

Councilor Christopher M. Rivera Councilor Rebecca Wurzburger

OTHERS ATTENDING:

Marcos A. Tapia, Finance Department Yolanda Green, Finance Division Melessia Helberg, Stenographer.

There was a quorum of the membership in attendance for the conducting of official business.

NOTE: All items in the Committee packets for all agenda items are incorporated herewith to these minutes by reference. The original Committee packet is on file in the Finance Department.

3. APPROVAL OF AGENDA

Mr. Tapia said Item #6 to has been postponed to the Finance Committee meeting of November 4, 2013.

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve the agenda, as amended.

VOTE: The motion was approved on a voice vote, with Councilors Bushee, Calvert and Dimas voting in favor of the motion, no one voting against, and Chair Dominguez absent for the vote.

4. APPROVAL OF CONSENT AGENDA

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve the following Consent Agenda as amended.

VOTE: The motion was approved on a voice vote, with Councilors Bushee, Calvert and Dimas voting in favor of the motion, no one voting against, and Chair Dominguez absent for the vote.

CONSENT AGENDA

A Budget Adjustment Request for Item #18, submitted for the record by staff, is incorporated herewith to these minutes as Exhibit "1."

- 6. BID NO. 14/03/B CITY OF SANTA FE SAFE ROUTES TO SCHOOL PROJECT AND CONSTRUCTION AGREEMENT; CENTURY CLUB CONSTRUCTION. (JAMES MARTINEZ)

- 24. REQUEST FOR APPROVAL OF A RESOLUTION RELATING TO THE DEVELOPMENT OF A VETERANS ART THERAPY PROGRAM IN SANTA FE; DIRECTING STAFF TO CONVENE A MEETING OF THE DEPARTMENT OF VETERANS SERVICES, VETERANS AFFAIRS, HEALTH AND HUMAN SERVICES AGENCIES, SERVICE PROVIDERS, ART THERAPY ORGANIZATIONS, NONPROFIT ORGANIZATIONS, FUNDERS AND RELEVANT AGENCIES AND ORGANIZATIONS TO DISCUSS THE ESTABLISHMENT OF A VETERANS ART THERAPY PROGRAM IN SANTA FE (COUNCILOR WURZBURGER, IVES, CALVERT AND DOMINGUEZ). (TERRIE RODRIGUEZ) Committee Review: City Council (scheduled) 10/30/13. Fiscal Impact No.
- 25. [Removed for discussion by Councilor Calvert]

5. APPROVAL OF MINUTES: REGULAR FINANCE COMMITTEE MEETING - SEPTEMBER 30, 2013.

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve the minutes of the Regular Finance Committee Meeting of September 30, 2013, as presented.

VOTE: The motion was approved on a voice vote, with Councilors Bushee, Calvert and Dimas voting in favor of the motion, no one voting against, and Chair Dominguez absent for the vote.

CONSENT CALENDAR DISCUSSION

- 7. BID NO. 14/10/B ON-CALL ROADWAY & TRAILS CONSTRUCTION SERVICES AND CONSTRUCTION AGREEMENTS. (JAMES MARTINEZ)
 - A. H.O. CONSTRUCTION, INC.
 - B. TLC PLUMBING & UTILITY
 - C. GM EMULSION, LLC

Councilor Dimas asked if these projects are being funded with CIP bond money.

Erik Martinez said the projects for which they utilize these contracts can be from wide variety of sources – CIP, General Obligation, federal funding, "you name it.".

Councilor Dimas asked if the money is available for the project, or what funds will be used once the projects start, if they get into play.

Mr. Martinez said no, the funding isn't yet identified, and will be identified as the projects go through the funding process.

Councilor Dimas said he understands \$200 million was set aside for this.

Mr. Martinez said the contract is capped at \$2 million, so they can't exceed that amount for the total of the projects. One the cap is reached, the contract stops and we have go out to bid again.

Councilor Dimas asked if there are current on-going projects.

Mr. Martinez said he can't think of any at the moment. He said typically they use these contracts, for example, to make City-wide ADA improvements after we overlay roadways, as well as small sidewalk projects like the Hillside/Cross of the Martyr sidewalk project they did this year, installation of bicycle lanes such as on Camino de las Crucitas. He said these are the types of projects for which they typically use these contracts. He said these projects are funded and built, and some are in the process of being built but those are under a separate contract.

Councilor Dimas asked if we have the funds to finish the existing projects.

Mr. Martinez said typically, the money already is identified for use. For example, with regard to CIP funding for street overlays, a portion is set aside to do all of the ADA improvements, so those funds are already budgeted and available, and they would move forward with design and utilize a contract of this type for construction.

Acting Chair Bushee asked if the City has previously used GM Emulsion, LLC.

Mr. Martinez said yes, they have been utilized on several street maintenance projects. He said they typically award to the top two bidders, but since we've had good experience with that bidder and they have experience in street maintenance, staff thought it would be a good idea to award it to the top 3. He said GM Emulsion is a local company and capable of doing that sort of work.

Acting Chair Bushee said it seems like a new company, and the reason for her question.

Mr. Rodarte said it is fairly new to Santa Fe, and in the last 2 years they've had small projects with us. He said they currently have a fairly large one they won through the competitive process, and currently they are filling the cracks on Camino Carlos Rey. He said the company meets all the requirements and they do employ almost everyone locally.

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve this request.

VOTE: The motion was approved on a voice vote, with Councilors Bushee, Calvert and Dimas voting in favor of the motion, no one voting against, and Chair Dominguez absent for the vote.

11. REQUEST FOR APPROVAL OF PROCUREMENT UNDER STATE PRICE AGREEMENT –
PAVEMENT RESURFACING SERVICES FOR WALKING TRAILS ALONG ARROYO CHAMISA
TRAIL; EMCO OF SANTA FE, LLC. (DAVID CATANACH)

Acting Chair Bushee said she walks and rides these trails frequently. She said she is concerned about the tree roots along the way, and asked if anything will be done about that.

David Catanach said the proposal is to break-down the existing surface, and during the process it will break down the roots. He said they walked the trails with Parks and Engineering, noting the majority of the trees are *Chinese elms*, so they have no concern that if we pulverize the roots it will kill the trees. He said they will break down the existing surface to a base material to make it wider, and then come back and put in a 10 foot surface throughout the whole length. In some locations it is already 10 feet, but the majority of the trails are 8 feet.

Acting Chair Bushee asked how they keep the edges from cracking/eroding.

Mr. Catanach said that's always a challenge, because it's thin to begin with. The best thing to do is keep it as thick as possible, but there is a lip at the edge, so it's a trade-off. He said they will do their best.

Acting Chair Bushee asked if they take care of drainage during construction, and Mr. Catanach said yes.

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve this request.

VOTE: The motion was approved on a voice vote, with Councilors Bushee, Calvert and Dimas voting in favor of the motion, no one voting against, and Chair Dominguez absent for the vote.

14. REQUEST FOR APPROVAL OF AMENDED MORTGAGE DOCUMENT AND AMENDED AND RESTATED PROMISSORY NOTE – SECURE REMAINING ACREAGE OWNED BY TIERRA CONTENTA CORPORATION; TIERRA CONTENTA CORPORATION. (ALEXANDRA LADD)

Robert Siqueiros said he is in attendance on behalf of Alexandra Ladd, noting in attendance are Executive Director James Hicks and Project/Chief Engineer Dave Thomas of Tierra Contenta Corporation.

Councilor Dimas asked how much land and lots are still available.

Dave Thomas, Project Engineer for Tierra Contenta, said they have to complete Phase 3 which represents about 1/3. He said about 50% of the land in Phase 3 is owned by the New Mexico School for the Deaf and 50% is owned by Tierra Contenta Corporation, so this is kind of a loaded question. He said we estimate that Tierra Contenta has approximately 1,000 to 1,200 units yet to be built and the School for the Deaf her approximately 800 units left to be built in Tierra Contenta, "so we are looking in the range of 2,000 units yet to be built." He said as far as area is concerned, the buildable area is approximately 350 acres.

Councilor Dimas asked Mr. Thomas if he is connected with the School for the Dear.

Mr. Thomas said, "There's about 8 landowners originally in Tierra Contenta. The Tierra Content Corporation, which was created by the City, started out with 860 acres. In addition, 270 acres was and still is owned by the New Mexico School for the Deaf. They're all in the same master planned area. There was another private owner who held 150 acres of property in the original master planned area, which Tierra Contenta ended up buying in 1999. In addition, the Santa Fe School District had some thirty odd acres in the master planned area. The School for the Deaf isn't under the same affordable housing agreements, but they have signed onto the master plan to develop it in accordance with the master plan."

Councilor Dimas said he has no further questions.

Acting Chair Bushee asked if this went back to Public Works.

Mr. Sigueiros said it went back to Public Works twice.

Acting Chair Bushee asked what was the additional information needed by Public Works.

Councilor Calvert said they wanted clarification on some of the numbers, figures and agreements. He said it was heard first at the September 9th meeting, and then asked for it to come back with the questions answered, with the action on October 7th.

Acting Chair Bushee said Mr. Snyder has brought concerns to us that by extending debt service on our own bonds and borrowing, that we are going to hamper ourselves from being able to continue to bond for further public works projects. She asked if this adds to the mix in any way, commenting this is a pretty early note, and she wants to be sure there will no deleterious affect on our ability to borrow or issue bonds.

Mr. Snyder said he would defer to the Finance Director to answer the question about the impact on the bonding. He said it is an old note, and the request is to extent the note another 10 years. He is unsure of the overall impact on the City's bonding capability for upcoming projects.

Mr. Tapia said this also is being amended to take off a percentage of 37 acres which was deemed unbuildable, so we're giving them a break on that part and taking it off the total note. He said, "As far as this having an impact on the bonding issue, I think since we do have that promissory note, however it's amended, even extended it isn't going to have a detrimental impact on how we bond. It will show as an asset even if we extend that."

Acting Chair Bushee asked how it is an asset when we are still owed \$2 million. She asked the people from Tierra Contenta their hopes in being able to pay off that debt, and asked if they have a timeline.

James Hicks, Executive Director, Tierra Contenta, 6005 Jaguar Drive, said, "Of course, the original note is set to expire next year. And the reason we need the extension, everybody understands the market for real estate has slowed to zero for us. We firmly believe that we can get the land developed and sold within that time period."

Acting Chair Bushee said, "If the City said no, what was the plan."

Mr. Hicks said, "At this point, I don't know what the plan is."

Acting Chair Bushee said, "The City never says no, so nobody has a backup plan."

Mr. Hicks said the Board would have to decide what the alternatives are at that point.

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve this request.

VOTE: The motion was approved on a voice vote, with Councilors Bushee, Calvert and Dimas voting in favor of the motion, no one voting against, and Chair Dominguez absent for the vote.

Chair Dominguez arrived at the meeting

16. REQUEST FOR APPROVAL OF PROFESSIONAL SERVICES AGREEMENT – PILOT PROGRAM FOR FOOD WASTE SEPARATION, COLLECTION AND COMPOSTING FOR ENVIRONMENTAL SERVICES DIVISION (RFP #14/02/P); REUNITY RESOURCES. (CINDY PADILLA)

A Memorandum dated October 18, 2013, to the Finance Committee and Public Utilities Committee, from Cindy Padilla, Director, Environmental Services Division, regarding the recommended amendments to the proposed agreement, is incorporated herewith to these minutes as Exhibit "2."

Councilor Dimas said he removed this so Cindy can add an amendment.

At the request of Acting Chair Bushee, Ms. Padilla presented information regarding the proposal to do a pilot program, from her Memorandum of October 9, 2013, which is in the Committee packet. Please see this Memorandum for specifics of this presentation.

Acting Chair Bushee asked if Reunity makes the machines, and asked if they are similar to the ones at the school.

Ms. Padilla said it will have nothing to do with the Eco-Vend machine, and they will be collecting the food waste separated, taking it to Payne's organic soil yard, and Payne's will be responsible for composting. She said this is one of the reasons for the amendment which is to clarify who will be making the compost.

Acting Chair Bushee asked the incentive for the business to utilize this service.

Ms. Padilla said it potentially could be a savings on the refuse bill if they are able to reduce their amount of waste, by 50% or by 30%, noting restaurant food waste is a large percentage. She said these questions will be answered through this pilot program.

Acting Chair Bushee said then it's just for commercial accounts and food related industries, and doesn't mean meats, but just vegetable matter.

Councilor Calvert asked if there is a cost to the City for the pilot program and Ms. Padilla said no.

Ms. Padilla said the containers to be used are ones which were purchased previously, and are containers in our inventory.

Ms. Padilla presented information regarding the proposed amendments from her Memorandum of October 18, 2013. Please see Exhibit "2" for specifics of this presentation.

Responding to Acting Chair Bushee, Ms. Padilla said the current City Code, Chapter 21 for Solid Waste, requires and gives the City exclusive right to collect all solid waste within the City limits, and food waste is defined as garbage which is defined as solid waste. They have to come through the City because we need to give them the authority to collect within the City.

Acting Chair Bushee said, "It sounds like they're just going through the bureaucratic hoops to get this done through the City."

Ms. Padilla said the City has its own composting program with Wastewater, but it's a different operation and this will give us good information to proceed in the future.

Councilor Calvert said on page 2 of the Memo, in the amendment for page 4, line 2 should include "conflict," as follows: "... would materially conflict with the..."

Ms. Padilla said she will ensure that correction will be made.

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve this request, with his proposed amendment.

VOTE: The motion was approved unanimously on a voice vote.

Chair Dominguez assumed the duties of the Chair

17. REQUEST FOR APPROVAL OF DISPOSAL AND RECYCLING OF UNUSABLE METAL DUMPSTERS AT ENVIRONMENTAL SERVICES DIVISION AND PROVIDE REVENUES FROM SALE OF SCRAP METAL TO KEEP SANTA FE BEAUTIFUL FOR CITY WIDE CLEAN-UP PROJECTS; MR. G'S SANTA FE RECYCLES. (LAWRENCE GARCIA)

Councilor Bushee said asked if the City has given the proceeds to Santa Fe Beautiful, and if the City has no other use for the dumpsters.

Ms. Padilla said Keep Santa Fe Beautiful works with the City on all of its projects.

Councilor Bushee said she knows that, but her question is if this is the first time it will receive the proceeds from the sale.

Ms. Padilla said yes, but Keep Santa Fe Beautiful has received proceeds from the sale of other recyclable materials from the yards or from other places in the City.

Councilor Bushee asked Ms. Padilla if there is no other use for the dumpsters.

Ms. Padilla said no, the dumpsters are beyond their usable life, noting they did an inventory of all of them.

MOTION: Councilor Calvert moved, seconded by Councilor Calvert, to approve this request.

VOTE: The motion was approved unanimously on a voice vote.

20. REQUEST FOR APPROVAL OF PROJECT AGREEMENT – HIRE ATTORNEY, ENGAGE OTHER LEGAL RESOURCES AND DWI FORFEITURE PROGRAM; NEW MEXICO DEPARTMENT OF TRANSPORTATION, TRAFFIC SAFETY DIVISION, HIGHWAY SAFETY PROJECT. (ALFRED WALKER AND GENO ZAMORA)

Councilor Bushee asked how many more years the City will keep getting this grant, and asked if we will hire a different attorney, or if this is to fund Mr. Walker to continue doing this.

Mr. Walker said this is the third year of a New Mexico Department of Transportation grant which has been decreasing each year. He said the DOT has been telling us they will, at some point, and probably after the current contract, terminate the grant. He said no additional people will be hired. He said, "It will partially fund my salary as well as any contract work we may need within the next year. We anticipate that there will be no problem paying for the position after this year."

Councilor Bushee said then it will be self-sustaining through the proceeds of the sales of vehicles which are forfeited.

Mr. Walker said, "That is the hope."

Councilor Bushee said so you expect the grant to stop after year three.

Mr. Walker said we actually expected it to stop after this part year, but we asked for more, and they gave it to us, and we actually did budget expecting we wouldn't get the money this year.

Councilor Bushee asked the status of this program being self-sustaining.

Mr. Walker said he can't say because he hasn't looked at the revenue and expenses. He said, "I would generally think that we are not fully self-sufficient, but we certainly bring in quite a bit of money."

Councilor Bushee asked Mr. Walker to provide a memorandum to her when he has the opportunity.

MOTION: Councilor Calvert moved, seconded by Councilor Dominguez, to approve this request.

VOTE: The motion was approved unanimously on a voice vote.

- 25. FRAUD, WASTE AND ABUSE HOTLINE (COUNCILORS RIVERA AND DIMAS). (LIZA KERR AND JUDITH AMER)
 - A. REQUEST FOR APPROVAL OF AN ORDINANCE CREATING A NEW SECTION 19-2 SFCC 1987, TO ESTABLISH A FRAUD, WASTE AND ABUSE HOTLINE FOR CITY EMPLOYEES TO REPORT ALLEGED FRAUD, WASTE AND ABUSE BEING COMMITTED BY EMPLOYEES AND OFFICERS OF THE CITY.
 - B. REQUEST FOR APPROVAL OF A RESOLUTION AUTHORIZING STAFF TO BUDGET AND ACQUIRE AN INDEPENDENT CONTRACTOR TO DESIGN, IMPLEMENT AND ADMINISTER A FRAUD, WASTE AND ABUSE HOTLINE FOR CITY EMPLOYEES TO REPORT ALLEGED FRAUD, WASTE AND ABUSE BEING COMMITTED BY EMPLOYEES AND/OR OFFICERS OF THE CITY. Committee Review: Audit Committee (approved) 10/02/13; City Council (request to publish) 10/30/13; and City Council (public hearing) 12/11/13. Fiscal Impact Yes.

NOTE: THESE TITLES MAY BE AMENDED IN ACCORDANCE WITH THE AMENDMENT SHEETS PROVIDED IN THE PACKET.

Councilor Calvert said he is fully in favor of this proposal. However, his concern is dictating staffing in an Ordinance which he doesn't think is the appropriate way to do staffing, because if you decide that you don't want to do this, then you have to amend the Ordinance. Additionally, he is concerned as to how we know we will need a full time person to do this, when we haven't done this yet.

The Committee commented and asked questions as follows:

- Councilor Bushee asked if it has to be done by ordinance.
- Councilor Rivera said he and Lisa Kerr met with the Audit Committee, and as he understands from them, Ms. Kerr is pretty much already over-worked. Ms. Kerr is the only person in her Division in her area. He said even with her current job, she already is in need of additional help. He asked Ms. Kerr to expand on this.
 - Ms. Kerr said their thoughts were that we would need at least a part time person to proceed with investigations that came up with the Fraud, Waste and Abuse Hotline, and when that person is not working on hot line issues, they could assist with additional audit work.
- Councilor Calvert said that needs to discussed in a separate matter and not necessarily as part of this Ordinance, reiterating this isn't the normal way of doing staffing. He understands the need for the Ordinance for the Fraud, Waste and Abuse Hotline and an FIR. However, he doesn't think it is good to dictate or request additional staffing in an Ordinance. He said he is having a little problem with that concept and the process.

Judith Amer, Assistant City Attorney, said part of the amendment was to add the requirement regarding a staff person. She said, "In the original bill, if you look at page 2, 19-2.4(B), there already was a requirement to provide sufficient budget to hire an independent contractor."

Councilor Calvert said an independent contractor will set this up.

Ms. Amer said they will design, implement and administer, which is more than just setting it up.

Councilor Calver asked, "If we have a contractor for part of this... when we're dealing with
confidentiality and stuff like that, is that something you want a contractor to be doing. Maybe it's
more appropriate, or not appropriate, I don't know, depending on your outlook."

Ms. Amer said, "I think the Internal Auditor wanted to do the administration part for those reasons that you mentioned, confidentiality.".

 Councilor Calvert reiterated this isn't the normal way we get additions to staff. He suggested perhaps a Resolution accompanying the Ordinance would be more appropriate.

Geno Zamora, City Attorney, said, "The difficulty that staff is running into, and why you're seeing a new format here is because you are starting a program possibly mid-budget year that isn't currently funded, isn't currently in the budget. So what staff has been working with is some type of mechanism where, if it's a new program, it's a new position, it all has fiscal impact, but isn't already budgeted, and we're trying to find a mechanism to pull money into that position mid-year."

Councilor Calvert said he understands, and asked, "Do you really want staffing in the Ordinance itself." He would think a better course is a Resolution with the Ordinance setting up the hot line, with the Resolution setting aside or designating resources to make it happen. He said we can also discuss whether it will be by a contract or full time staff. He said, "I understand the auditor's point of view, and the Audit Committee, but you're sort of like creeping into staffing arrangements by saying, well this will require some more staff and our auditor already needs more staff. It's sort of using this as the excuse to get that FTE, and I think we would rather have the justification. I don't have a problem expending the money needed to administer this program, but I don't think, again to beat a dead horse, that should necessarily be language in the Ordinance."

Mr. Zamora said, "And I'll defer to Judy as far as the mechanism goes. What I'm used to is a Resolution setting aside the funding, creating the role and directing the Finance Committee to include that in a future budget, getting a Resolution to get it into, for example, next fiscal year's budget. So again, I'll defer to Judy as to process, how to do it in an existing year where it wasn't budgeted."

Councilor Calvert reiterated his concern with doing this by Ordinance.

Mr. Zamora said, "We'll look into alternatives."

- Chair Dominguez said he wants this to be part of the Code, but he does understand the concerns regarding getting the position funded. He asked Councilor Rivera if he would like to amend it so we direct staff to get the funding before the actual program is in place.
- Councilor Rivera said after hearing Councilor Calvert he agrees 100% with him that it should not be in the Ordinance. He said, "If we want to strike that language that's fine, and then I can propose a Resolution at mid-year to fund the position, or however long it will be once the program is established."
- Councilor Calvert said we can introduce a Resolution now, and by the time the Ordinance gets to Council the Resolution can catch up with it.
 - Melissa Byers said, "There is a Resolution in the packet that refers to the Ordinance, but we could amend the current Resolution in the packet so that for fiscal year 13/14, we would budget the position and the third party contractor. So I could amend that Resolution to say that."
- Councilor Calvert said then we can ignore all of the stuff on the amendment page, and Mr. Zamora nodded yes.
- Councilor Bushee asked what Ordinance are we amending to create this, or what Code Section, commenting that she agrees with Councilor Calvert's concerns.
 - Ms. Byers said, "We are amending Chapter 19 of the City Code which is the Personnel Chapter, and because this relates to fraud, waste and abuse by City employees, we thought that would be the best place in the Ordinance to put this."
- Councilor Bushee asked if the general public would be using this new service, or is it just to be used internally.
 - Ms. Byers said, "This would just be internally for City employees to report fraud, waste and abuse by other City employees. Councilor Rivera felt we already have our constituent services where the public actually can file complaints, so this would be just an internal process."
- Councilor Bushee said, "Since this is such a limited pool, I do question whether this is something that would require a full time, additional person to conduct, without even trying to put it together to know the capacity of the existing internal auditor. And we have the Audit Committee. So how will we know. Why are we putting the cart before the horse. Are we going to proceed like we did with the Landlord/Tenant Hotline for the general public, that was like \$10,000, or \$15,000, when we first started it, and it didn't require a whole heck of a lot."
 - Mr. Amer said, "The only thing I have to add is that there is also a mechanism to report fraud, waste and abuse to the State Auditor's Office. They have a hot line. This program was for City employees to report fraud, waste and abuse."

- Councilor Bushee asked how Councilor Rivera wants to proceed.
- Councilor Rivera said, "I think we need an ordinance change is what Judith told me. I initially
 proposed a Resolution, but was told it had to be and Ordinance change. And again, we are
 establishing the program for employees to call in and make reports which would then go to Lisa's
 department."
- Councilor Bushee said then we are going to try this without a full time person initially.
- Councilor Rivera said, "Initially. We're trying figure out how much work it will add to Lisa's plate, and we're anticipating that it's probably going to be significant for her."
- Councilor Bushee said, "Again, if this were the way for any of us to backdoor new positions without going through a budget process, we'd all be filling in new Ordinances and saying I need this position. I agree with the idea."
- Councilor Rivera said he also agrees and he is okay with the change.
- Councilor Bushee said she would like to be a cosponsor of the legislation.
- Councilor Calvert asked how we need to proceed.

Ms. Amer said, "We are going to delete reference to creating a budget and position in the Ordinance, and have the accompanying Resolution mention that, and when it comes through then you can have that discussion."

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve the Ordinance in Item 25(A), minus the suggested amendments.

VOTE: The motion was approved unanimously on a voice vote.

Responding to Councilor Calvert, Ms. Amer said we can revise the current Resolution.

MOTION: Councilor Calvert moved, seconded by Councilor Dimas, to approve the Resolution in Item 25(B) with direction to staff to amend the Resolution as necessary to conform with the Ordinance we are passing.

VOTE: The motion was approved unanimously on a voice vote.

26. REQUEST FOR APPROVAL OF A RESOLUTION RELATING TO THE ENHANCEMENT OF CITY OF SANTA FE ENVIRONMENTAL SERVICES AND THE USE OF RECYCLED MATERIALS; DIRECTING STAFF TO ESTABLISH ORDINANCE PROVISIONS RELATED TO: COMMERCIAL BUSINESSES PROVIDING EQUAL SPACE FOR TRASH RECEPTACLES AND RECYCLING CONTAINERS; MANDATED GREEN WASTE COLLECTION DAYS AND THE MANDATED USE OF RECYCLED ASPHALT, WITHIN THE CITY LIMITS, THAT CONTAINS A MINIMUM OF 10% RECYCLED GLASS TO BE USED WITHIN THE CITY LIMITS OF SANTA FE (COUNCILORS BUSHEE AND IVES). (NICK SCHIAVO) Committee Review: City Council (scheduled) 10/30/13. Fiscal impact – No.

Councilor Calvert asked if the green waste collection days will be free to the public.

Ms. Padilla said yes.

Councilor Calvert said it would be helpful to state that specifically in the Resolution so that is clear.

Councilor Calvert said on page 2, line 7, it provides, "All asphalt that is used in the city limits contains a minimum of 10% recycled glass..." He said this Resolution asks staff to study some of these things, noting the Resolution directs staff to establish an ordinance. He said his preferred wording would be to ask staff to study and analyze a possible ordinance, because until we get some of this analysis done, we don't know what and how we want to do this.

Councilor Calvert asked how this will work with current contractors, for example, in Albuquerque, how will we get the materials together.

Ms. Padilla said the yard-waste collection will be free to residential customers, but not to the general public. She said, with regard to any of the 3 conditions, when an Ordinance is brought forward, the FIR will include a cost/benefit analysis.

Councilor Calvert said if we're saying there will be an ordinance, then he needs answers now as opposed to that it is being studied for a possible ordinance. He asked if the Environmental Services Division has the equipment to support #1 given limitations on existing space.

Ms. Padilla said it would be that commercial businesses within City would have to provide equal space, and staff could look at developing standards for enclosure space requirements for both dumpsters. She said currently there are staff that reviews for dumpster space.

Councilor Calvert said the requirement would be that commercial businesses must provide equal space for trash receptacles and recycling containers. He is concerned that it should say "equal," and it should just say space for both, but whether it is equal space is yet to be determined. He said he worked with Councilor Dominguez on some of the changes on Airport Road development, and we did ask that they provide space for recycling, but that was for new projects. These are existing projects that have confined space right now that they can use. And so if we say equal, or even if we don't say equal, we say you have

to provide for both, and most will have to provide for both within a confined space that exists now. And right now, they might have a dumpster that fills up the whole space. He asked who has to provide the different size equipment that will fit within the space constraints.

Ms. Padilla said space for businesses, especially within the downtown area, is limited and they have to provide both within the existing space, noting we have to work within the confinement of the existing equipment.

Councilor Bushee said she didn't come in with 3 separate ordinances with specifics for you to debate, she came with a Resolution. She met with people from the Sustainable Santa Fe Commission, Mr. Schiavo and others, asking for some low hanging fruit, and things which were easy to do. She said she didn't expect to debate the details with the ordinances forthcoming. These are approaches to try and get us to do things we probably already should have been doing a long time ago. She said one simple one was they should be able to have a space for recycling and trash, and the other was to mandate the use of recycled asphalt as a way to make sure we use up the glass instead of having it go to the landfill. She said there is a market to do this.

Councilor Bushee would also like to look at diverting cardboard from the landfill, and believes we should provide more than a stick to mandate. She said these are "no brainers."

Councilor Calvert said what he is used to seeing as the norm, is a Resolution asking staff to look into something, and once you get the results then you can bring the ordinance forward. He said this assures that we're going to have an Ordinance on each one of these things before we even study them.

Councilor Calvert suggested a language revision on page 1, line 12, as follows: "...DIRECTING STAFF TO <u>STUDY AND ANALYZE POSSIBLE</u> ORDINANCE PROVISIONS RELATED TO..." He said this way we will get the analysis and then we will bring forward the Ordinance.

Responding to Councilor Bushee, Councilor Calvert said we do need to go through this step, because when we are asking for staff resources, we need to have the consent of the Governing Body to do so.

Chair Dominguez asked if the City is prepared to be able to measure and quantify the 10% in terms of recycled glass as it pertains to asphalt.

Ms. Padilla said, potentially yes. She said they can tell you the quantity of glass collected at BuRRT, but she needs to do some research with the Streets and Traffic Division in terms of the utilization of glassphalt and the amount of glass required to pave one mile of road, and if we have the quantity to support that. She said a lot of analysis and research needs to be done to quantify that. She said, however, they have a lot of information that "can get us started."

Chair Dominguez said that speaks to some of Councilor Calvert's concerns, but the question is if you are prepared to fulfill what is asked for in the Resolution without significant cost implications.

Ms. Padilla said they can do the analysis on the information and do the research requested in the Resolution.

Mr. Schiavo said currently he is researching other cities with this requirement to make sure that the 10% is a reasonable amount in the asphalt.

Councilor Bushee said this is just saying bring forward a concept, and if the analysis shows that something that can be pursued and/or it is costly, that will be the analysis. She said it is her way of wording, and these are the easiest things we can achieve right now. She said it may or may not result in an Ordinance, so she is hesitant to just try and change the language, because it really is about pursuing these concepts, do an analysis, and come to us and tell us what is or isn't workable.

Councilor Calvert said he fully supports the concept, and he isn't implying otherwise. However, he said he is speaking to the language which directs staff to establish ordinance provisions related to these things and we won't know that until we actually do the analysis and the reason for the language he suggested.

Councilor Bushee suggested adding "where possible."

Councilor Calvert said that would be fine.

Ms. Padilla said she believes it is important that the City look at creating our own local markets for the recyclables that are collected within the City which is a key to sustainability.

MOTION: Councilor Bushee moved, seconded by Councilor Calvert, to approve this request with amendments: On page 1, line 13, as follows: "... ESTABLISH ORDINANCE PROVISIONS <u>WHERE POSSIBLE</u>, RELATED...." and on page 2, line 2, as follows: "....ordinance provisions <u>where possible</u>, in..."

VOTE: The motion was approved unanimously on a voice vote.

END OF CONSENT CALENDAR DISCUSSION

DISCUSSION

27. PUBLIC HEARING

REQUEST FOR APPROVAL OF A RESOLUTION RELATING TO THE HEALTH, SAFETY AND WELFARE OF THE RESIDENTS OF THE CITY OF SANTA FE; ENCOURAGING THE SANTA FE POLICE DEPARTMENT AND THE RESIDENTS OF OUR COMMUNITY TO COME TOGETHER IN A COLLABORATIVE EFFORT AND FOR A COMMON CAUSE – TAKE ILLEGAL DRUGS OFF THE STREETS OF SANTA FE (COUNCILORS DIMAS, DOMINGUEZ, TRUJILLO, RIVERA AND BUSHEE). (CHIEF RAYMOND RAEL) Committee Review: Finance Committee (postponed) 09/30/13; Public Safety (scheduled) 10/15/13; and City Council (scheduled) 10/30/13. Fiscal Impact – yes

Councilor Dimas said he asked for a public hearing because there are people who wanted to speak on the Resolution. He said the reason he brought the Resolution forward is because he thinks it's time to aggressively take action to get drug traffickers and illegal drugs off our streets. He said he has been talking about this over the past two years, and it isn't a political move on his part.

Councilor Dimas said too many of our young people are dying as the result of drug abuse. He lost his own 32-year-old daughter 2½ years ago as the result of drug abuse. He said there is nothing harder than losing a child and he wouldn't wish it on anyone. He said the Resolution has several well thought out components which will bring the community together, commenting this has to be a community effort to get this going and to resolve this issue to some degree. He said he isn't foolish enough to think we'll get every drug trafficker, but we can work together and make it a community project we can do.

Councilor Dimas said Gloria Mendoza has worked hard to get a town hall together with Councilor Bushee and himself. He said the Town Hall will be on October 29, 2013, from 5:30 p.m. to 7:30 p.m., at the Southside Library and he encourages everyone to attend the meeting. He said it is important for our community to discuss what to do with drug addicts. Councilor Dimas shared his experiences with his daughter, who was a drug addict from age 13.

Councilor Dimas said, "The drug use of New Mexico exceeds cities like Chicago and Detroit. And this is nothing to be proud of I guarantee you, New Mexico leads the nation in drug-related deaths. It's something we've got to do something about. I see a number of policemen here today and they know exactly what I'm talking about, because they deal with it every day. When I was a police officer, I dealt with it, but I never thought I was going to have to deal with it as a father. When you have to do that as a father, it's the most difficult thing that you will ever have to do in your life. There's nothing worse that waiting for that dreaded phone call that your child has died, and I got that call from one of the officers who's sitting in this room today and nothing is harder than that."

Councilor Dimas said, "I'm asking for a 24/7 drug hotline where people in our community can report suspicious, illegal drug activity, and I'm asking that our Police Department respond to those calls. I have people tell me in our community that they've called asked for assistance and reported people who are suspicious, dealing drugs from their car or their residence, and it's taken our Police Department 2-3 hours to get to that place before it's even investigated. That's not acceptable. I think we need to place a close patrol and do whatever we can to get these people off the streets in jail or into a program where they're getting help. We have drug addicts that are selling drugs to support their habit. Fortunately, with the LEAD program we have in place now, there's an opportunity if they're not consistent drug traffickers or doing it to support their habit, we have the LEAD program they can get into and into a drug treatment program."

Councilor Dimas continued, "In Santa Fe, unfortunately we don't have that opportunity. I know my daughter went to several different drug programs, treatment programs. Unfortunately those programs are only 6-weeks long. After 6 weeks she got out, and they would contact her for about two weeks after she got out. But after that, they're back with their peers and doing the same thing again. We need a lot of different programs in Santa Fe to help to bring our children and those addicts into a place where they are long term. We don't have any long term commitments here in Santa Fe or anything available."

Councilor Dimas continued, "We need a strong follow-up program on all these programs here in Santa Fe. This is just a small deal that we can do right now, the 24/7 Hotline. I think getting our neighborhood watch groups involved in this, actively involved, is important. The 24/7 Hotline should be publicized anywhere and everywhere we can get it published – on our buses our transit systems – where people know what the number is to call and report any suspicious activity at any time. It's going to really help our community in the long run all the way around."

Councilor Dimas continued, "I've asked also in this Resolution to establish close patrols in the areas reported for suspicious drug activity. I know our Police Department can't spend 24/7 watching for drug traffickers, and the Regional Task Force will still be in existence doing a lot of the stuff that we require for drug enforcement in Santa Fe. We just need to work more closely with them and our Police Department needs to get a little more involved. I would like to see us coordinate with the First Judicial District Attorney's Office to more aggressively prosecute all the drug trafficking cases. We need to get more aggressive at that level."

Councilor Dimas continued, "I would like to see us lobby the New Mexico Legislature during the 2014 Legislative Session to mandate mandatory sentencing for illegal drug narcotic drug trafficking cases. And the reason I say that, just as we did with DWI when it was running rampant in the State, Judges were allowed, myself included, until we had mandatory sentencing, we didn't know how to sentence. It was something where we could do whatever basically what we wanted to do until we had the mandatory minimum sentencing. And once that was passed by the Legislature, we had to sentence them to jail and they were required to do certain things before they could get out of jail, and if they violated probation then we stuck them right back in jail. So it got a lot stricter, and that's what we need to do with these cases."

Councilor Dimas continued, "We need to coordinate with the Santa Fe Public Schools, private schools and other youth organizations to present drug and alcohol abuse prevention programs. That is already in place. The Chief has placed an officer to do that and to get that going. I'm glad to see it's finally in place, and something I think will help in our community. We need businesses, such as utility companies, plumbers, landscapers, roofers, delivery persons and others that are on the streets of Santa Fe during the work day, the courage to partner with the Santa Fe P.D. and to report any suspicious activity that may be related to illegal drug activity and to use the drug hotline."

Councilor Dimas continued, "One of the questions that came up was being able to establish a drug hotline. And I've talked to Ken Martinez, the Director of the RECC, about the implementation of the Drug Hotline at the RECC. And he indicates, and I quote him, 'I have looked into what is needed to have that ready, and I've found at the rape tip hotline we set up a few years back during a surge in sexual assault calls in the City is still effectively operational within the dispatch consoles. This includes the dedicated

telephone number which has been tested and is working. This means there is nothing more that needs to be done, other than informing the public of the number and deciding on a specific process by which the calls received on this line can be relayed for follow-up or response to the Police Department. We are ready, if and when we are called upon to do this.' I'm asking this Committee to approve this Resolution and send it forward to the City Council for approval."

Public Hearing

Gloria Mendoza was sworn. Ms. Mendoza thanked Councilors Dimas, Bushee and Dominguez for their support for the Town Hall meeting. She said the Superintendent of Schools approved her getting the information to the high schools and mid-high schools. She said they will be putting out flyers all week and over the weekend. She will be on KSVF on Monday morning at 7:30 a.m. to let the community know about the meeting. She said there are a lot of people in Santa Fe who have families and friends with drug addiction. She said we are giving them this opportunity to come and educate themselves on the resources available for their family member who is addicted as well as what we can do as a community to help Chief Rael come down on the dealers in Santa Fe, commenting there are a lot of them. She thanked Chief Rael for attending and speaking to this issue.

Ms. Mendoza spoke of her own efforts to get dealers out of her neighborhood, including following one drug dealer to his house and speaking to the owner of the house about the issue of drugs. She said he no longer comes to her neighborhood, noting his parents threw him out of the house. She talked about the people begging for money for drugs, and said we as a community need to tell them there is help and what we can do to help them. She said these are people who have someone who love them. Ms. Mendoza said neighborhood involvement will cut down on crime, domestic violence, shootings. She said there is so much to do. She said Albuquerque is having a meeting similar to our meeting regarding drug use and abuse. She is in support of Councilor Dimas' Resolution.

Raymond Herrera, 379 Hillside Avenue, was sworn. Mr. Herrera said he agrees with Councilors Dimas and Gloria Mendoza, and there is really nothing more he can add, except is to thank Gloria Mendoza for spearheading this project. He said he attended rally downtown, and he was amazed at numbers of people that showed up for that rally. He thanked Chief Rael and Sheriff Garcia for showing up at that rally. He said he thinks people will cooperate. He said he believes we can get rid of the drug dealers.

The Public Hearing was closed

Councilor Bushee said there is a \$50,000 fiscal impact for the hotline. However, she understands there is no fiscal impact and we will use the existing hot line.

Chief Rael said they can absorb part of this into their burglary patrols, such as the overtime for close patrols, if we get a specific all we can use those personnel. He said if the line already exists at the

RECC as indicated by Councilor Dimas, they can use the existing line and there shouldn't be much in terms of additional costs to get it operational. He said as mentioned earlier, he already has an office assigned to the Schools to address the drug and alcohol prevention program, so that is already incorporated into our budget. He said, "So the cost will be minimal, if anything at all."

Councilor Bushee said then this was just an earlier FIR.

Chair Dominguez said, "It says here that some of it is to be determined."

Councilor Bushee said she just saw the \$50,000, and wondered about the source of those funds.

Chief Rael said the FIR had included other calculations initially considered.

Councilor Bushee thanked Councilor Dimas, as well as Gloria Mendoza. She said we have addressed problems previously – domestic violence and rape – and we've come together as a community to address those. She said some of the sources for the problems in our community are the drugs and drug addiction. She appreciates all of the efforts made to date and looks forward to the Town Hall.

Councilor Calvert said he is fully supportive of this, and asked to be included as a sponsor of this legislation.

FRIENDLY AMENDMENT: Councilor Calvert would like to amend the Resolution on page 3, at the end of line 12, to add language to the effect that we also need to educate the City's partners on what to look for, such as constant traffic to someone's home, to be able help us most effectively. THE AMENDMENT WAS FRIENDLY TO THE SPONSOR OF THE RESOLUTION, AND THERE WERE NO OBJECTIONS BY THE OTHER MEMBERS OF THE COMMITTEE.

Councilor Dimas said we could also use the Public Information Office, once the hotline is established, to relay information to people in the company on how to use it, what to be looking for, commenting the Police Department can help us greatly in explaining to people what to look for. He said we will need an abundance of publicity on this. He reiterated he would like the Drug Hot Line put on the buses with a small explanation of what to look for. He thinks this can be a real community effort to accomplish what we want to accomplish.

Councilor Dimas thanked Gloria Mendoza and Raymond Herrera for attending this meeting this evening, especially since Ms. Mendoza has been ill.

Chair Dominguez said we do a lot of saving, if you will, in Santa Fe, and this certainly is an endeavor that is worthwhile, and thanked Councilor Dimas for bringing this forward and to the public for taking an interest in this.

MOTION: Councilor Dimas moved, seconded by Councilor Bushee, to approve this request with Councilor Calvert's amendment.

VOTE: The motion was approved unanimously on a voice vote.

28. UPDATE ON SANTA FE POLICE DEPARTMENT SHIFTS AND SCHEDULING. (POLICE CHIEF RAYMOND RAEL)

A Memorandum dated October 8, 2013, with attached slide presentation *Finance Committee Report October 2013, Raymond J. Rael, Chief of Police*, is incorporated herewith to these minutes as Exhibit "3."

A copy of a press release dated January 26, 2012, from the Department of Justice Office of Justice Programs, regarding *USDOJ Studies Officer Wellness and Work Shifts*, entered for the record by Matthew Martinez, Police Officers Association, Police Patrol Representative, is incorporated herewith to these minutes as Exhibit "4."

Chief Rael reviewed the slide presentation. Please see Exhibit "3" for specifics of this presentation.

Councilor Bushee asked Chief Rael if he had considered preparing a slide with regard to how these shifts have affected recruiting and the costs related to that.

Chief Rael said he didn't, but right now, the Recruiting Team reports that there are 22 people in background investing, another testing is coming up with approximately 34 who have expressed interest, and a class from Wisconsin which has invited us back to graduation who are interested in testing for our department, we have hired 8 people and have 11 vacancies. He said the 8 people are cadets and will go to the Academy in January. There are 8 more to be scheduled for Chief's interview and a large list pending, so "we are not hurting for recruits at the moment and we conceivably will have a pending list by the end of November."

Responding to Councilor Bushee, Chief Rael said currently there are 11 vacancies that haven't been hired.

Adam Gallegos, President, Police Officers Association, said, "Do not let the wool be pulled over your eyes, because this is a sham." He said the 5/8 listed here are being described on a 4-shift model, compared to a 4/10 shift that was on a 3-shift model. He said when you add the 4th shift you will skew the numbers to the positive, because you're adding another shift. If you took the same model on the 5/8 and put 4 shifts of 4/10 hours you could conceivably increase your overlap by 16 hours a day that you could put people on the street, so "don't be fooled by the presentation that is here." We first went to 5/8 from the 4/10, we went to the 3 shift model he said anyone who was here when that happened can tell you it was a disaster, because people were staying late, overtime was through the roof and administration's answer was to create a 4th shift, add overlap and we won't have this problems. The only reason these

numbers are close is because of the 4th shift. He said, "They're touting all this money that they saved – \$180,000 in overtime, but by adding the 4th shift, they tacked on \$61,000 in shift differential, so that brings down their \$180,000.

Officer Gallegos said the department also cut down on officers covering special events, with 5 officers working Indian Market instead of 15, which is also true of Spanish Market. He said Sergeants on patrol no longer are allowed to work overtime if a Sergeant is needed on the next shift. They're having the police officer force cover as acting Sergeants, which is the overtime savings. "So don't be fooled by the \$180,000, or even the \$106,000." He said two weeks ago they went into contract negotiations to bring what they thought was a common sense plan to immediately address recruiting, which was negotiating the schedules. He said the City came back and said, no, it's not negotiable you lost in arbitration. He said there are three principles subject to negotiation – hours, wages and working conditions. He said they didn't address wages because they know the City's budget situation. He said, regarding working conditions, they gave up leave 3 years ago to help the City meet its budget shortfall. They were only requesting the negotiation of hours, and they were told no. He said they are still waiting for a meeting to resolve the impasse.

Officer Gallegos said if the \$106,000 figure is true, their plan to go back to 4/10 would automatically increase recruitment. He said, as he has said previously, the best recruiters are the cops on the street, and how they got most of the recruiting in the past. He said, "They're not recruiting any more, I know, I've asked, I've talked to them." He said it's a no-brainer. He said they'll tell you that 4/10 isn't an issue for recruiting, but he believes it is. He said they should look at the take home vehicle program and modifying it, moving it back to 45 miles will have an immediate impact on recruiting as well. He said, "I stand by my statement that this is a sham because of the comparison of the shift models."

Matthew Martinez, Police Patrol Representative, POA, said he handed out a document he prepared on his off-time, and reviewed the information in Exhibit "4," saying the 4/10 schedule is the best schedule for officers to work for well being, quality of life and to prevent sleep depravation. Please see Exhibit "4" for specifics of this presentation.

Officers Martinez said the hours calculated on the Police Department Report show a savings of up to an officer, noting he knows officers that work 2,080 hours not 1600 hours a year, so they saved enough for 3/4 of an officer, noting "we don't know who this officer is, and as far as the savings, it's a hypothetical officer." He said when the change was made to 4/10, they never saw studies. He was told that municipalities were figuring ways to stop the retirement and have the officers use their time, and their numbers show that has worked. He said the SWAT Team used to train on Fridays, and the majority of the Team had Fridays off, so they would work 10 hours a week overtime, or 40 hours a month, which is \$16,000 per month or \$192,000 per year. He said we're still bleeding money on the 5/8 shift when you think about it and do the math.

Officer Gallegos said he heard Chief Rael say interesting things about normal sick leave pattern, and our sick leave is in line with normal patterns. He said sometimes 2 days off isn't enough, and when you have court one day and training one day, you didn't get a day off. He said the police officers sometimes work 2 weeks straight without a day off. He said they don't have time to decompress, noting injuries and complaints are up. He said he has a struggle getting people to work overtime. He said the Chief said the 5/8 shift is the reason property crimes are down, but when we hit the peak for property crimes, we had been on 5/8 for almost 14 months. He said the reason property crimes are down is because of the "hard work of these boys and girls back here, because they all care about their jobs, and everyday are out there arresting burglars, doing follow-up, collecting evidence."

The Committee commented and asked questions as follows:

- Councilor Dimas asked Officer Gallegos if he has any other hard numbers that would be of particular interest to this Committee, in terms of money and City budget, in overtime and such. He said Officer Gallegos spoke about some numbers, but he is looking for the hard numbers.
 - Officer Gallegos said they are in the process of putting together a packet, based on information just received from the City. They are doing their own analysis right now, and should have something pretty quick.
- Councilor Dimas said he and the members of the Committee would like to have that. He would like Chief Rael also to "roll out your numbers."
- Chief Rael said he believes all of the numbers are contained in the report. He asked the Finance
 Director to do an analysis and verify that all numbers received were accurate, and he believes Mr.
 Tapia can confirm that the numbers we acquired were directly out of the system as well as the
 accuracy of the numbers as checked by him."
- Councilor Dimas asked when he can get those numbers.
 - Officer Gallegos said in two weeks, by the next Finance Committee.
- Councilor Wurzburger asked for clarification "that both the Chief and the union are getting the same data from the Finance Director, and that's what you're going to be presenting back to us at the Council with your own interpretations of the data. Is that what we're getting, because numbers are numbers, correct. And I'm just trying to see, and I apologize to members of this Committee for not knowing what direction you've given in terms of comparable data, etc., but, to me, numbers are numbers, so we must see more than numbers. It's got to move to the interpretative level, or you're adding some other kind of information."

Mr. Martinez said it's just numbers. He said, "We were afraid to start asking people for specific numbers on the City, but we were able to receive some of those numbers. It would be the same numbers that were given to the Chief and to the administration. There would be no skewing at all, so it would be the same numbers that you have before you, but I will add we kept being told there was a number, I believe it was \$178,000, over and over and over. And I couldn't figure it out, and finally that's when it dawned on me that the lump sum of the majority of the overtime was going, when we were originally on the 4/10, to the SWAT Team. And when they got rid of the 4/10 and went to the 5/8, that took care of, pretty much, the majority of that lump sum of overtime. So that's where that number keeps popping up."

Councilor Wurzburger said there will be different perspectives on the interpretation of the data and
the underlying assumptions. She said, "The information I think will be useful from my perspective,
is to say, not just the gross numbers of this is the difference, but the underlying causes or
assumptions that have to do with the changes or the non-changes, that's what you're trying to get."

Mr. Martinez said yes, and unless we calculate and analyze each specific employee and each specific amount of overtime for the last 3 years, and that would give us our specific amount.

Councilor Bushee said numbers can be manipulated. She said the 4th shift is curious to her. She said she needs to know that "I'm having apples to apples, oranges to oranges," not the reverse.

Chief Rael said the numbers are the same, whether it's four shifts, three shifts, two shifts. You can only work with the numbers of personnel that you have available to fill in the shifts. He said when you look at that, what comes into play is where you can place these people and what the best scheduling is to get the most efficient amount of hours out of the schedule. He said if you compare the same number of people and plug into the same number of shifts, no matter what it is, it will always show that the 5/8 provides more people to put on the streets and more overlap coverage, regardless of how you arrange the shift coverage. He said 12 hours may be as efficient, but the 4/10 always comes out last.

Councilor Bushee said the problems continue no matter what we try.

Chief Rael said the PERA rules were changed by the Legislature which prompted a mass exodus, but prior to that, our vacancies were minimal.

Councilor Bushee said she can't remember when we weren't always on this treadmill of trying to fill positions, and she hasn't seen that the shift change has made a difference. She said she continues to hear that it's a national problem, and then later the PERA changes and then it was the buyout practice. She is beginning to believe that nobody wants these jobs, because it's a tough career. She said she just wants to fill these positions with happy, healthy people doing the job they want to do, which would reflect in the kind of job they can do in the community. She has given up with community policing. That was a promised land we never took a second look at, and then we ran into this "rat race of how do we fill these positions."

Councilor Bushee continued, saying she is back to the basics of how to fill these positions, how do you keep them, and so forth. She is hearing different things about how to do this – you are getting her in the weeds of something she shouldn't have to be involved with. She wants to deal with this at a policy level. She said she can't say the shift change made the difference in people wanting to stay in these jobs.

Chief Rael said, "There is no absolute answer. There is no panacea. The truth is that it is a dynamic department and we are going to be facing one problem or another as they develop."

Councilor Bushee asked why hold onto these shifts as if it is the answer.

Chief Rael said, "Councilor, with respect, because they allow me to be efficient, and they allow me to address the deficiencies and vacancies, which without, I would not be able to move against property crimes. I would not be able to be pro-active and I would not be fiscally responsible as directed by this Governing Body. To direct otherwise, will destroy my ability to focus on property crimes and bring those numbers down, which as you can tell from the reports, have been coming down. Complaints from our citizens have reduced. The majority of the people I talked to out there, the issue was property crime, property crime when I got here. That is no longer the case."

 Councilor Bushee said then he is saying that these 5/8 shifts are the reason property crimes are down.

Chief Rael said these contribute immensely to his ability to be able to focus the resources he needs to address that problem.

Councilor Bushee asked if there were no additional budgetary efforts at trying to reduce property
crimes, no other additional funds were spent other than what he perceives as savings from these
shifts.

Chief Rael said he has requested no additional funding, and has stayed with the existing budget, and believes the numbers speak for themselves.

 Councilor Bushee asked, regarding Full Court Press, if the Chief was able to do it because of the 5/8 shifts.

Chief Rael said Full Court Press contained a component where he was able to use patrol officers to go out and proactively patrol areas where we identified burglaries were occurring and criminal activity was taking place. He said some of that was overtime, and some was the result of the additional staffing that was freed up because he had 35 officers on the street in a 24 hour period, as opposed to a lesser number.

 Councilor Bushee asked when we shifted our focus to property crimes, did any other area of crime go up. Chief Rael said crimes rates fluctuate continually, but over all, I have not seen an increase in any one particular area, although there may be a spike one month and a reduction the next in certain areas. However, he is seeing no long term trends of crime rate increase at this time.

Councilor Bushee asked the Chief if he is happy with the level of crime reduction overall in the
City. She said we started from "the worst place possible, second highest rate of property in the
nation."

Chief Rael said he is not happy, and he won't be happy until it is at zero, although he doubts that is possible.

- Councilor Bushee said she is attempting to get at things from a policymaker perspective, but "doesn't know if we're getting answers."
- Councilor Wurzburger said, ""From a policy perspective, my inference from the discussion on recruitment, was I did not hear the Chief say that the shift difference was a variable in recruitment. I heard, loud and clearly, that the POA thinks that is a variable in recruitment. I would like, as policymaker, some further information on that perception of numbers. And part of that is qualitative data. The other piece I would like that is not covered earlier in Councilor Bushee's comments, is that again, I don't think we can locally reject out of hand demographic and other changes that occur nationally, particularly age shifts."
- Councilor Wurzburger continued, "And I would like some sort of interpretation in this discussion, from both POA and the Chief, in terms of how changing demography has affected the ability to have a better effect on our recruitment. I would also like to have some discussion of the impact of returning veterans and those who cannot come back to work, which is a population we had for a long while in New Mexico that were able to fill those. And now they come back and are yet ready to do that. So I think there are both demographic, economic, national and other kinds of trends that need to be taken into perspective as we closely look at the recruitment problem. And it just can't be done in the geography of our 25-45 miles."
- Councilor Rivera said one thing we forgot to ask also includes retention of officers with the two types of schedules we are talking about tonight. He said at a YAFL game a week ago, he spoke with an officer who had just resigned, and asked him the reason. He said, "He specifically said it was the change in shift and the fact that he lives in Rio Rancho, so the take home policy as well. But he said, even if the take home policy stayed the same, if the shift went back to the way it used to be, he would have stayed. I can't help but, like Councilor Bushee mentioned, listen to the officers, the ones that are actually doing the job, the ones that are out there every day, 7 days a week, 365 days a year doing the work and ignoring the things that they're saying. I've asked for, not even a change of schedule, but a comparison of the advantages and disadvantages of both schedules side by side, and have not received that. So this has been a little bit frustrating, but knowing where the officers and what's best for them, as a quality employer in this City, we have to deal with quality of life issues as well as simple employment and benefits. And I'm hearing overwhelmingly from the officers that this is a quality of life issue."

- Councilor Rivera continued, "But back to what the officer was saying is that with the change in shift, he's now forced to come in with his own privately owned vehicle 5 days a week, versus the 4 he had to. He's now having to pay for his own fuel, and there is an additional day of fuel he's having to pay for, so it's little things like that. And to us, it may not mean a lot, but I believe to the officers it means a lot. I ask that we also look at retention issues as well."
- Councilor Dimas said he agrees that morale has more to do with this than anything else. He said when he was a police officer, he the 4/10 and 5/8, and being a police officer, it was a lot easier to work the 4/10. He said if you have a day of court and training it is easier because at least you have a family life. He understands it's difficult to work 5 days and have to go to court and then have something to do the next day and not having a day off.
- Councilor Dimas continued, saying, "I think morale is a big issue when it comes to the 4/10 and the 5/8, and I think we need to include that in the analogy we do in comparing the two side by side where is the morale and what do officers get out of this, and what do the officers want in addition. And I think, as an administration you can work something out and at least negotiate this so everyone is satisfied and the City is begging the biggest bang for its buck. A happy employee is a better employee all the way around, and if they're unhappy, they're looking for jobs in other departments that are offering more. But if they're happy here, they're not going to be looking for another job, and the retention level will come way up."
- Councilor Bushee said these issues will be compounded as we are facing annexation. She read
 from one of the handouts, "The 8-hour shifts may be more costly than departments realize. Those
 on 10-hour shifts work the least amount of overtime, and they also talk to... yes, so it's conflicting.
 But the other is, what are the trends nationally and even locally for shifts."
 - Chief Rael said the trend is to go back to the 5/8. He said only one department in the State is working full 4/10, and that is Las Cruces. He said Albuquerque is working a modified 4/10 on graveyard. Otherwise, all of our regional competitors are all working 5/8. He said the Santa Fe Sheriff's Department is 5/8. Sandoval County is 5/8. Rio Rancho is 5/8. New Mexico State Police is 5/8, and Motor Transportation is 5/8. He said it is 5/8 nationally and regionally, and the majority of the departments by eighty-something percent are working 5/8 shifts.
- Responding to Councilor Bushee, Chief Rael said in Albuquerque the hybrid is: 4/10 on graveyard,
 5/8 day shift, swing shift and mid-shift.
- Councilor Bushee asked if graveyard is a consideration, and asked why he didn't consider that.
 - Chief Rael said, "Because I don't have the manpower. I would need 30% more people to be able to field the number of officers I have now in order to address calls for service, pro-active requirements this Governing Body has place on him and address all of the other issue. Councilor, I have worked both 4/10 and 5/8 and I fully understand and appreciate how nice it is to have an extra day off."

Chief Rael Continued, "But I've been tasked with providing the citizens of Santa Fe with the most efficient service that I can get out of this Police Department in a financial crisis. And I have been doing that to the best of my ability. And this is one of the areas that I can directly impact."

Councilor Bushee said she is staying with recruitment and she doesn't think the City has cut the
Police Department budget, but we have been maintaining and filling positions. She wants to know
how we can recruit and retain.

Chief Rael's reiterated the status of recruiting efforts. He said we will have a list of eligibles and should have enough for annexation if the City approves his request to add 10 police officers.

- Responding to Councilor Bushee, Chief Rael said there was a full complement for two days right before the Legislature changed the PERA Rules, and then we started bleeding people again due to retirement. He said when he first took on the issue of shifts, he was tasked with reducing property crimes and making the most efficient of his budget and manpower, and this was the only thing he saw at the time that ensured we started dropping numbers on property times, commenting he believes they have been successful
- Councilor Bushee said then you are sure you don't want to continue effort at negotiating some kind
 of a hybrid.
 - Chief Rael said, "As I was reminded during Public Safety, I can't be discussing negotiations in a public body in a public forum."
- Councilor Bushee said she is just talking about his policy and if he intends to stick with the 5/8 shifts.
 - Chief Rael said he fully intends to stick with his 5/8 until such time as he receive the additional resources I need in order to be as efficient as I am now.
- Chair Dominguez asked if he has an analysis of response time.
 - Chief Rael said he doesn't have it with him.
- Chair Dominguez asked if the response time has increased or decreased, or if he just doesn't know.
 - Chief Rael said he hasn't looked at that in some time.
- Chair Dominguez said if response times have increased, what does that mean.

Chief Rael said it could mean a lot of things. One, that the City has gotten bigger, the traffic has gotten thicker if it increased. If it decreased, it potentially could men we have more manpower available, or that we just got lucky and the officers were closer when that sequence of calls came in.

Chair Dominguez asked if the shifting could contribute to an increase in response time.

Chief Rael said it may, or may not, noting there are a number of vacancies that would make it difficult to provide a straight up or down comparison, so it could and it could not.

Chair Dimas asked Officer Gallegos if he has those response times.

Officer Gallegos said he does, but not with him. He will provide that as part of the packet for the next Finance Committee. He said, "The response times in all different 3 priorities of our calls have increased tremendously from 2010 to now."

Councilor Dimas asked what he means by tremendously.

Officer Gallegos said, "I'm talking in each category by minutes."

Chair Dominguez said, "But can you say that that's contributed to the shifting."

Officer Gallegos said, "I can say that, and I'm sure the other first line supervisors that are here can say that, because some days you don't have the bodies and you can't find the over-timers to come in, so you're working with 7 people as opposed to 9. And on that point, minimum staffing was 10 before we went up to 5/8 and then it was reduced to 9."

- Chair Dominguez asked the Chief to provide the information regarding response time.
- Chair Dominguez asked if the reduction of burglaries if a City-wide statistic.

Chief Rael said yes.

Chair Dominguez asked if he has it by area.

Chief Rael said he has it in the computer.

Chair Dominguez said he is going door-to-door and talking with constituents on a more intimate level, and it is frustrating that property crime is the thing they bring up the most. He wants to get some of the data broken out into areas. He said, "Ultimately, we are the ones that have to answer to the constituency. We're the ones that have to go to meetings in peoples' living rooms and answer these questions. Data can sometimes be the difference between judgment and reality and we need some of that data. I think that what's going on here is the difference between judgment and reality."

- Chair Dominguez thanked Councilor Rivera for asking for that side-by-side comparison, which is
 one of the things that has been missing in discussions.
- Chair Dominguez said in the graph, it appears there is an increase in sick time of 30%, and asked
 if that is in 2013.
 - Chief Rael said he accounted for the leave, and he suspects some of the usage is intentional to subvert the system to say that the 8 hour shifts aren't working.
- Chair Dominguez said then you think that officers are taking leave intentionally.
 - Chief Rail said, "I believe it's possible. I'm working on it."
- Chair Dominguez said that's a pretty serious claim.
 - Chief Rael reiterated he is looking at it, and if he can verify it, he will bring it forward.
- Chair Dominguez noted there is not the same kind of increase in annual leave use.
 - Chief Rael said he is looking into it and will bring it forward as soon as he has an analysis.
- Responding to the Chair, Chief Rael said he believes that was the number of days off that were
 erased in the contract negotiations, and furthermore a lot more is being placed on sick leave such
 as bereavement leave which is now being counted either sick or annual leave.
- Chair Dominguez said in the past, we've been able to look at the overtime cost for people taking sick leave.
 - Chief Rael said the system is old and he can't break it down as far as he would like, and they can use only the data that's available.
- Chair Dominguez asked if we have had that data previously, and Chief Rael said he will check.
- Councilor Bushee said the numbers keep changing, noting she has been getting information from news articles. She said Officer Gallegos said a simple cheap way to do this would be to go back to the 4/10 and tweak the take home policy a bit so it is 45 miles rather than 30. She asked his opinion of these things which don't have a big price tag. She said, "I'm trying to stay out of the weeds and stay on the idea of how you can recruit and retain." She asked if Lt. Strahan is here this evening and the Chief said no. She said we have anecdotal reports from Councilors, and the Chief's thoughts on recruitment and retention, but "what we really need to hear is how we are going to keep officers in this job and find the new ones we need for annexation."

Chief Rael said Lt. Strahan has prepared a list of available candidates and what we're doing to get them, and he will ask him to forward that to the Committee via email and to be prepared to discuss it at the next forum whatever it may be. He said, "In any case, I decided to withdraw that proposal and make some adjustments after it was tabled at the Public Safety Committee. And then learning that we have 23 potential hires in background, we had 16 at that time. Since then, we're interviewed, we're down to 11. We have 9 cadets set to start December 9, 2013. 11 of the 23 are certified cadets. We also have 3 more laterals that are in background process. So again, there is the potential that we could fill these, and I don't believe all of that is necessary since our recruiting is doing well."

Councilor Bushee said you don't think we have to use any of these incentives for retention.

Chief Rael said, "I do not believe that the cost at this point would benefit us as much as focusing on some of the other areas, such as hiring the people for annexation."

 Councilor Bushee said then you think out of these cadets you will be able to fill all the positions we need for annexation down the road.

Chief Rael said, "As I indicated earlier, I think we have a darned good chance of having a list that we can actually select from."

 Councilor Bushee said we have thrown money and any policy we could at the problem, and it doesn't go away.

Chief Rael said, "I don't have a crystal ball. All I can tell you is we're working as hard as we can to fill these positions, and it appears as though we're getting to the point where we are going to have a list of eligibles that we can actually hire from."

Councilor Wurzburger said it would be helpful for the Council, if it can be done without a lot of work, to get some perspective on what has actually has happened in the 3-5 years with recruitment. She said, "The issue I've heard from officers and management is that we get X number of people and then they don't make through the academy. It would be helpful to know what is actually done, in terms of recruitment, to get the perspective on the numbers. She does see a difference, and she would like to get these numbers. The question is where it's going to go in the future, and again, the big question for me is how we exponentially increase the numbers, because of the annexation burden we're going to face very quickly. I think that kind of perspective would be useful for me to better understand what our options are for proceeding if you could do that."

Chief Rael said he will do his best to get that for her.

Councilor Wurzburger said she remembers time when we weren't talking about going out of state
to find people, and we were very focused on who we could get in New Mexico, and we were told
we are competing with the same people and they're "moving from here to there to there"

back and forth within New Mexico. She said she is encouraged, although she may be misremembering to what degree we've implemented an out-of-state recruitment process, and the Chief to comment.

Chief Rael said we were fortunate to get a grant and the assistant of graduate students and a professor from the Anderson School of Management at UNM, and they currently are assisting to put together a market analysis to identify the individuals we can go to, both in and out of state to make it more attractive, identify our most lucrative recruiting areas, identify trends.

- Councilor Wurzburger said this will be helpful for us to better understand that context, to see what specific things are in place that are new and different that have resulted in the numbers we're seeing right now. She said, "I do agree with Councilor Bushee that, and I'm sure others as well, that the impact of annexation is another variable that we'll be back-treading again, and maybe that's another policy issue we should be looking at or should have looked at."
- Councilor Wurzburger continued, "The other concern I want to express is, at a recent domestic violence forum where three of us were in attendance, again, we started talking about making choices. And several of the candidates expressed the willingness to go ahead with that position. But again, how are we going to balance all of this together. And I think the main issue for me is tying a strategic recruitment plan that goes beyond six months a year, and looking at the kind of variables that could affect that, including the need for additional resources."
- Councilor Rivera said, "I wasn't going to say anything, but I'm a little taken aback that you would accuse the people that you are supposed to be representing of calling in sick on purpose. You've worked public safety, Bill Dimas has worked public safety, I've worked public safety, and I'm sure it is different in police than it is in fire, but I'm sure it's moreso in police. I venture to say that none of these people would call in sick on purpose, because then they leave one of their fellow brothers or sisters hanging, and if something happened to them, they wouldn't want to live with that. I can't believe that type of statement would be made here. I don't know if you meant to say it, if it was out of frustration, but there are ways to deal with sick leave abuse. I'm sure you've taken those. How many people have been written up for calling in sick."

Chief Rael said, "Again, as I indicate, I'm beginning to suspect that is the case, and I am taking a look at it and will address, if, in fact, I can verify that that is accurate."

 Councilor Rivera said, "I'm not sure it was a fair comment to make. Again, I wasn't going to say anything, but I was taken a little aback by that."

Chair Dominguez's remarks here are inaudible

29. REQUEST FOR APPROVAL OF PROPOSED CHANGES TO PROCUREMENT MANUAL SECTION 29, CONTRACT MODIFICATIONS/ AMENDMENTS/ CHANGE ORDERS. (ROBERT RODARTE AND JUDITH AMER)

Robert Rodarte presented information from his Memorandum which is in the Committee packet. Please see this Memo for specifics of this presentation, noting there was an extensive discussion at Public Works Committee on this issue. He said this gives the City Manager the authority to approve change orders under \$50,000, noting anything above that will be brought to the Governing Body for approval.

MOTION: Councilor Bushee moved, seconded by Councilor Dimas, to approve this request.

VOTE: The motion was approved unanimously on a voice vote.

30. UPDATE ON EMPLOYEE RAISES (3-YEAR HISTORY). (SANDI PEREZ)

A copy of *Non-Union Pay Increases January 1, 2012 to September 13, 2013*, dated October 21, 2013, is incorporated herewith to these minutes as Exhibit "5."

A copy of a 46 page report which includes all salary increases 01/15/2010 through 10/4/2013, is incorporated herewith to these minutes as Exhibit "6."

A copy of *budget savings due to interim appointments/temporary upgrades*, dated October 21, 2013, which is a sampling of the available data, is incorporated herewith to these minutes as Exhibit "7."

Sandra Perez, Interim Director, Human Resources Department, reviewed the contents of the reports and how they were compiled, for this agenda item. Please see Exhibits "5" and "6," for specifics of this presentation.

Ms. Perez talked about the level of difficulty they had in extracting this data from the system, which is the reason these exhibits didn't make it into the Committee packet, and apologized. Ms. Perez said the data was retrieved from the pay stubs, and it is person side pay only, and they were unable to pull in position titles because that is in a data base. When they tried to merge that data, it never merged without errors and it threw off the person side of the data, so they pulled the positions and have provided the raw data just by person only at this point.

Ms. Perez said Exhibit "5" is a similar report that was produced based on a media request several weeks ago, for non-union employees for the indicated time frame, and spoke about the difficulty in compiling that report. She noted it took a good month to gather the information for this report. She said Exhibit "5" contains 9 individuals that are in an interim position or have taken on double duty of positions, to help you to understand the benefit/impact to our budget. She reiterated this is not the complete list and is a sampling only.

The Committee commented and asked questions as follows:

- Chair Dominguez would like the numbers of union versus non-union, how many people got raises and those amounts. He said Ms. Perez talked about the savings/benefit of "the interim concept."
 He asked what criteria is used to give everybody else a raise.
 - Ms. Perez asked if he is speaking in the same concept of using an interim position.
- Chair Dominguez said these days everyone is doing more with less. He said it is obvious that
 Brian Snyder gets a raise because he is moving from a Department/Director to the City Manager,
 and said there are others. He said, "But what about everybody else. What criteria was used for
 that. So if I can get that information, that would be helpful as well."
 - Mr. Snyder said he can answer from his perspective, but doesn't know he will ever be able to answer from Robert's perspective as to what the past City Manager did, and what his analysis was. He said, for example, Nick Schiavo is Interim Public Utilities Department and Water Division Director. He said, "My analysis was what I was making when I served in that role, and basically, what does it cost to hire somebody at this range, and how does it fit into the overall structure. So Nick was an easy one. And some of these are easy because people have vacated the position recently and I use that as a guide, what's reasonable, how does it fit in, what are the levels of duty. Nick is the easy one because that's the salary I was making."
- Chair Dominguez said some of it is pretty obvious. However, generally speaking, there are a lot of people who are doing more with less, even through reorganization, people have taken on extra duties. He just wants to find out if these raises are equitable, and there is no favoritism "or any of that stuff." He wants to know what criteria were used in that analysis for all of those people.
 - Mr. Snyder said, "One of the challenges with that is that there are non-union and there are 3 different union contracts. For example with AFSCME, if someone is asked to take a temporary promotion to fill another position, it is governed by the AFSCME contract, which talks about 5-20% range. If you ask them to do more, a step up, you have to give them a bump between 5 and 20%, of if that doesn't get them to the bottom of the range, then you have to take them to the bottom of the range. So it could be 33% to get them to the bottom of the range. So different things are looked at. He said if it is temporary, covering for a supervisor when they're out of the office for 2-3 weeks for whatever reason, typically it is a 10% bump. That's the way the contracts are written."
- Chair Dominguez asked, in the analysis between union and non-union, which employees' job descriptions have changed. He hasn't had time to look through all of this data. He said times are tight and money has been tight over the last few years, and every year we are "literally counting pennies." He said if any money is left over it seems that money should be prioritized by the Governing Body and not the administration. He said we could have used some of those funds, for example, to fix the police department, commenting he doubts that would be enough.

- Chair Dominguez said a statement he wants to make is, "In my opinion if there are any monies left over after we set a budget, and salaries are established based on the budget, the Governing Body should have the option, at least, to prioritize some of that money."
 - Mr. Snyder said through vacancies throughout the year, any funds not expended from the personnel line item rolls back into the City budget every year, and those funds are used for the next year's budget. He said he doesn't have the opportunity to take any salary savings and move it to a different line item. He said the unexpended portion of the personnel line item every year rolls back in for the next year's budget cycle.
- Chair Dominguez asked how we are paying for raises.
- Mr. Snyder said, for example using Nick Schiavo, if there are salary savings, if he gets a 10-15% bump but the position was budgeted at \$90,000, and he's getting \$10,000 more to do that position, then there is a salary savings of \$88,000. That \$88,000 in salary savings is \$900,500 on the third handout that Sandy handed out. Assuming we don't fill any of those positions within this fiscal year, we'll roll back into the budget for the next year.
- Chair Dominguez said it is his opinion, it is a play on words and it really is coming from salary savings. He doesn't want to get into the details right now, because he hasn't looked closely at these handouts, but he just wanted to make the statement that, "I think the Governing Body, as representatives of the people of the City of Santa Fe, of the taxpayers, should at least have an option to be able to prioritize any salary savings, any savings, any extra cash, whatever the case may be, and I just wanted to make that statement for now, because I suppose there could be more to come."
 - Ms. Perez said, "So when a position vacates and then we advertise that, and then we fill that and a person from within City government gets that position and it turns into a promotion, they'll get a raise. And so that raise is then paid for because that's what the position was budgeted at. So what you're saying is then anything that is left, or that might have been a difference of where they were and what they promoted into, if it was below the other person..."
- Chair Dominguez said he is making a general statement. Things are tight, and it's hard to go to constituents and tell them money is tight we can't do whatever they want done. However, they see in the newspaper that people are getting raises and so on and so forth. He reiterated that it is his general statement that, in his opinion, the Governing Body should have the option to establish some of those priorities, and he will leave it at that.
- Councilor Calvert said perhaps some raises were given, but he wants to know the net effect on the budget. He said as you point out here, all these people got raises because they were promoted, but there was a net savings of \$905,000 to the budget. So it wasn't as if we were spending money we didn't have, or were "robbing Peter to pay Paul." This was coming from within the system and therefore wasn't taking away from other priorities. It was partly making people do more with less,

because we had people doing 1-2 jobs, and even if we were paying them more, but it actually saved us money overall.

- Chair Dominguez said he understands that, and there are some things which are pretty obvious.
 However, it is hard to answer to the public for certain things when we're not as transparent as we could be, "and I'll just leave it at that."
- Councilor Bushee said wanting to deal with this from a policymaker's perspective, she is frustrated the information wasn't in the packet, commenting she doesn't see the Evergreen Study.
- Councilor Calvert said that's the next item.
- Councilor Bushee said she wants to know if we will get it to read in advance, and asked why the
 executive summary of the Evergreen Study couldn't have been in the packet.

Ms. Perez said, "I apologize. I got notice of the change to the agenda late. I had to find the information. It wasn't in my office. I did recover it from 1-2 of staff members. I was not involved in the Evergreen Study. I had to read through it and study it. I put together the summary based on what I thought the request. I hope it meets your needs. If it doesn't, I assure you, I'll do everything I can to make sure that happens. I have it, if you would like the handout now, I'm happy to give it to you."

- Councilor Bushee said no, she wanted it in the packet. She said, "Brian, we've had many conversations since I asked for this information and asked this to be an agenda item at the last Council meeting which was October 9, 2013. All I'm suggesting, is it would have been fair for this Committee to say, well we just got this information, we can't study [discuss?], but I'd asked for it. Because I'm reacting to articles I'm reading in the newspaper, rather than having the information given to me. And so, then explanations are then given to me after the fact, where I'm saying, okay, so I get it. And in the Police Department Lieutenants there's compaction, but does that mean that everybody above the Lieutenants get a raise, and some of these positions aren't sticking around necessarily, the people in them. In their temporary status, why would a raise be recommended."
- Councilor Bushee continued, "And I understand Brian that a lot of what we are dealing with today are decisions that were not yours, and you've used Nick for an example. He's an easy one to use because he is literally taking on two very large and important departments in the City and there is precedence for what that salary would pay. So for us to really understands, so let's take Sandy for instance. How do we start with \$29 an hour and end up with \$47 almost \$48 an hour, why does it start, and I get where the \$47 almost \$48 almost comes from when I look at Vicki Gage, but then how do you start. And so this was done on 1-11-2013. So, we've got a 62% raise, so why if it's... you're bringing it up and it's a temporary position, again and you're going back to what Vicki was making and you're now calling it a cost savings, why would it start at \$29 an hour.

- Chair Dominguez asked if Geno Zamora would like to speak to that.
 - Mr. Zamora said, "Just before the City Manager started answering on individuals, I'm in the room and I just want to help the Governing Body maintain clear lines here. And I know the City Manager just spoke a moment ago using an individual employee as an example. I'm just starting to get concerned by comments by staff as well as well as comments by the Governing Body about individual employees and salaries. I know that they are public record. However, per the Charter, the Governing Body only has the authority to set personnel systems. And so I'm concerned, and this is just advice just sort of preventive medicine, that we'll get into an instance of this person should be making this, this person should be making that."
- Councilor Bushee said, "That wasn't the line of questioning Geno, just to be clear, I'm asking how we get to the percentage raises we have. Is it a policy that you started too low, and so I wanted to use the example that made more sense to me than Nick Schiavo. Because it makes all the sense in the world to me why Nick Schiavo, who's taking on two very significant departments in the City, and you know where the salary level started for that department head. So I understand and I'm not in here trying to get into personnel matters."
 - Mr. Zamora said, "And it's a broader comment, not only to the Governing Body members, the Committee, but also to staff, in that yes, the last question that I heard that made me stand up was, let's use Sandy as an example, and let's go over her original salary and her next salary."
- Councilor Bushee said, "That's right here. That's the public record everybody's got."
 - Mr. Zamora said, "I realize that's public record, but again, I'm just reminding the Council that their role in the personnel process is setting the Personnel System, also dealing with the budget."
- Councilor Bushee said, "And that's directly what this question relates to."
 - [Mr. Zamora's remarks here were inaudible because the Chair, Councilor Bushee and Mr. Zamora were all talking at the same time."
- Chair Dominguez said, "This is all in the context of transparency, right Geno."
- Councilor Bushee said, "Yeah. And in fact maybe what we need to do as a Governing Body is have these salaries on the sunshine portal."
 - Mr. Zamora said many governing bodies do that, and we may already have done that.

[Too many people talking at the same time to transcribe here]

Mr. Zamora said, "It is a very fine line. All I'm doing is presenting as an informational matter, that the Governing Body does not hire and fire City employees, does not set salaries...."

- Councilor Bushee said, "Absolutely. Nobody's even attempting that."
- Chair Dominguez said, "That's what led to my question about the criteria, and just to be clear, as
 the Chair, I'm saying just be careful."
- Councilor Bushee said, "Absolutely. My questioning I guess was for Brian. And since we don't
 have the guy here that did the hiring, I presume you were not the guy that did the hiring, when you
 actually start again Brian, remind me."
 - Mr. Snyder said, "I believe in July of this year."
- Councilor Bushee said, "This hiring took place the first of the year, so I presume that was the former City manager. So I guess my questioning, and you know, the Councilor really came from the idea of if there are cost savings we should be able to dictate that. I'm not so sure I'm coming from that place. What I'm coming from is really trying to understand, and I know there's some discretion on the part of the City Manager to do the hiring, but I'm trying to understand the criteria on some of these things."
- Councilor Bushee continued, "So for instance this is really about how do you determine a starting salary so I as a policymaker are not alarmed when I read in the newspaper for instance, and don't have this information given to me as a member of the Finance Committee, that there's a 62% increase from January 2013 to October 2013. So perhaps the starting salary was too low, who dictates those things. Where does that come in, and let me back up an ask another question so I understand this, in setting policy only from my perspective, so all these cost savings, are these all exempt positions that you listed on that one page. And I am interested in the Evergreen Study if you could hand that out too Sandra, that would be great. There we go."
 - Ms. Perez handed out copies of Exhibit "8" to these minutes regarding the Evergreen Study
- Mr. Snyder said, "Councilor Bushee, on the third handout you're referencing, they're not all exempt. The majority are exempt and several are non-exempt."
- Councilor Bushee asked which ones are non-exempt.
 - Mr. Snyder said, "The Interim BDD Facility Manager is not exempt. The Transit Operations Manager is not exempt. The Business Analyst is not exempt, and the Technical Review Division Director is not exempt."
- Councilor Bushee asked what, for instance, determines the starting salary, in the one I just quoted of \$29.50 per hour.
 - Mr. Snyder said, for each position, there is a salary range for a low, mid and high point.

- Councilor Bushee asked if it wouldn't be based on experience, of which she believes Ms. Perez has a lot.
 - Mr. Snyder said he can't speak to why her starting salary was set where it was. He said it has to be within the range and presumably based on their skill sets and experience they brought to the job. He said in all cases they are hired for the position they are doing. He said she is referencing Ms. Perez who was not hired as Interim Director, and was hired for a different position. He said the said the salary she was paid was within the range of the position she was hired to do.
- Councilor Bushee asked what was the other position.
 - Mr. Snyder said she was hired as the EEO/HR Compliance Officer.
- Councilor Bushee asked if it was Robert Romero that gave her the promotion.
 - Mr. Snyder said he promoted her to the Interim HR Resources Director.
- Councilor Bushee said then that salary was set on what Vicki Gage was making previous to that.
 - Mr. Snyder said it was within the range of that position and he used the previous person in that position as a guide for setting that salary.
- Councilor Bushee said, "I'm just really going back to what we are allowed to do in terms of addressing compaction, things we really look at and that's why when we studied it. But when you do see, for instance the higher percentage increases, would you say as a general rule they were made to people being promoted. So I'm going back to this little bit thicker, but not quite as thick, so let's just start alphabetically. We have a Mark Allen, he had a promotion. From what position to what position."
 - Mr. Snyder said he doesn't have what position he was in previously, but he can get more detail on that position.
- Councilor Bushee said, "I see where folks went from, maybe a Captain's position up to a Deputy
 Fire Chief's position, and I see that would have a considerable increase. I also see it in the
 Lieutenant's in addressing their compaction. And again, I was alarmed to see some of these
 positions... who actually promoted Amber Marchi.
 - Mr. Snyder said he understands a position was advertised, and a list of eligibles was created by H.R. based on applications submitted. And based on that, interviews were hired with a four-person hiring committee at the City and a recommendation for her hire was made.
- Councilor Bushee said, "Yeah, I understand, but so, you're telling me, with all these promotions, who really do we hold accountable for giving out promotions, committees, or is it usually the City Manager.

Mr. Snyder said when a position is advertised, it goes through a process, and it's recommendation of the division direction/department director to the City Manager to advertise the position, and through HR and Finance to make sure that the budget and the position exist. Then the position is advertised. The same process, a committee is set up for interviews and a recommendation is made through the same process, through the division, the department, HR, Finance to make sure everything is lined up, that we followed the hiring process, that the budget is available, and it is all a recommendation to the City Manager. So everybody in the chain of command makes a recommendation."

- Councilor Bushee said then the City Manager is the "final guy" [inaudible]."
- Councilor Bushee said, "Then back to the issue of how decisions are made. It's just up to the City Manager to decide who gets promoted."
 - Mr. Snyder said, "No."
- Councilor Bushee said, "Well I know you delineate a process."
 - Mr. Snyder said, "We do follow the Personnel Policy Rules and Regulations as well as, depending on the union, each of the 3 union contracts. To touch on what you talked about previously, I don't specifically look at percentages. I look at the position that person has applied for, or are filling in an interim capacity, or whatever that position is, the range and I look at what the value is of that position."
- Councilor Bushee said, "So back to your one pager with a lot of savings outlined. So tell me, in the case of someone filling the Acting Housing & Economic Development Director position and previously also filling the Economic Development Communications Administrator position, do you ever just exact cost savings by having them promote up and not necessarily take two jobs on. Do you have the opportunity at some point when you're promoting somebody to then just leave the other position vacant and exact some vacancy savings."
 - Mr. Snyder said, "That's exactly what all these cost savings stand for. The total of \$905,892 for these 9 samples, these are all vacant positions."
- Councilor Bushee said then the Economic Development Communications Administrator position is not filled.
 - Mr. Snyder that is correct, and each of these people fill not only their interim capacity, but the previous position that they held. So they're doing two jobs, or 3 or more jobs.
- Councilor Bushee said, "I understand they're making more money. So does that mean that \$71,400 is going to be in next year's budget cycle for us to go ahead and figure out how to spend."

Mr. Snyder said if that position remains vacant for one year, meaning the person in the interim capacity is filling that position for one year, there would be an additional \$71,400 in savings for that position. If all these positions remain vacant for one year, as they're budgeted now, there would be an additional \$905,892 in the personnel line item for the next year.

Councilor Bushee said, "Give me an example of a Constituent Services Division Director.
 Nobody's filling that position right now. No one's doing that job."

Mr. Snyder said that is double filled. The person that is doing that is the Acting Parking Division Director. When someone is filling an interim or an acting role, not only are they doing that role, but they are doing the position they previously came from.

Councilor Bushee said, "I understand, but for instance, let's do Constituent Services Division
Director. Has that been a year that they're been double billed doing two positions."

Mr. Snyder said he can't speak to the exact length of time that position has been.... He said, "It's actually more complex than that as well. It's not just the number of years in this case. I'm not sure what the question... I don't know that would look into and I can look into is, where was this person being paid out of. Were they being paid from parking in this case, or out of Constituent Service. How were they being funded. So it could be a year."

 Councilor Bushee said, "From my perspective, it wouldn't matter. I'm just looking at is there savings and how can I spent it."

Mr. Snyder said, "In this case, I believe it would matter in that Parking Division is an enterprise fund. So the money in the enterprise fund would revert back to the enterprise fund, rather than the General Fund."

 Councilor Bushee said, then those are the only two positions paid from an enterprise fund. "You're saying it somehow can't be reallocated for some other effort or position."

Mr. Snyder said there are several on the list which are enterprise funds. The Public Utilities Department Water Division Director is paid from an enterprise fund, the Wastewater Division Director is paid from an enterprise fund, the Parking Division Director is paid from an enterprise fund, the BDD Facility Director is paid from an enterprise fund. He said there are limitations on how these funds can be transferred out of those enterprise funds into either another enterprise fund or into the General Fund.

Councilor Bushee said, "I guess what I'm asking is. Let's just keep using the issue of the
Constituent Services Division Director. So it's been more than 2 years and it is an enterprise...
well, I don't think Constituent Services is paid out of parking. I don't think it ever was. I think it's a
General Fund position."

Mr. Snyder said that is correct.

- Councilor Bushee said, "So in that case, if I've got \$75,000 in savings, it's been past 2 years or
 over 1 year, what do you intend to consider it. Do you see that as a vacancy savings and where
 does that go in that column, that money."
 - Mr. Snyder said the costs savings are all, in his opinion, vacancy savings, which go toward balancing the current fiscal year's budget.
- Councilor Bushee said, "Then from this nine hundred almost a million dollars, how much of this is going to be used to balance the budget, because you've told us that we've had operational deficiencies. And I'm looking at things like Parks where we're really struggling out there to try to keep up with all the new growth."
 - Mr. Snyder said the \$900,500 is currently balancing the FY 13/14 budget. He said, "If I filled each of these positions that people are double/triple filling, I would have \$900,500 additionally on the budget. This is worked into the current fiscal year's budget."
- Councilor Bushee said, "We get concerns brought to us from all kinds of employees, and overall, I do appreciate Councilor Dominguez's questions trying to distinguish this between union and non-union. We're just here to make sure that... first of all I really don't appreciate reading things in the paper, and it is astounding to see some of the percentages of raises, but when you back it up and you look at what that means from an hourly perspective, or where they started, or what positions they're covering, a lot of them make sense to me, particularly, like I said the Lieutenant promotion and the compaction, but I'm looking overall."
- Councilor Bushee continued, "We've got 1,800 employees, and we've got a few negotiations that are just stalled out, it's my understanding, with some of the unions. And in the meantime, I think it's fairly disheartening..... well it's disheartening for me to read in the newspaper that there are these raises and try to understand the basis of them. It's also disheartening to the employees that are being told there is no money for raises and many of them are double-filling positions. It's really just trying to make sense of it all. For me, the things that stood out, and finally being able to look at this in one place, because I was getting smatterings of information from one direction or another. There are some that I don't quite understand. There are some that are even losing money, some of the employees, they went back down into a position, but some that were... I think the highest was 121%. And obviously they must have... or a hundred and something percent. I've been going through this.... and I went back as far as 2010, because there were just different raises that people have complained about. So there's a 104% increase back in 2011. There's... again, they may have started too low."
- Councilor Bushee continued, "I'm trying to understand if we've been able to address compaction in any way, aside from the Lieutenant's positions. And I know we're going to get into the Evergreen study here in a minute, but can anybody speak to compaction throughout the 1,800 employees, aside from what we just heard or read in the papers with regard to our Lieutenants positions."

Mr. Snyder said, "There was some police compaction that was addressed with some adjustments in pay, this was prior to my taking over as City Manager. I'm not aware of any current salary compactions. That being said, just today, I got a request to evaluate someone to look at were they brought in at the correct salary. Those are a day by day question that's asked. We do the analysis, and if the analysis shows that something was misread in the union contract when the person was hired, whether it was this year, last year, 10 years ago, we look at that, and make an educated decision on how we handle that situation. As far as I'm aware, currently, today there are no known compaction issues."

- Councilor Bushee said she wanted to deal with compaction in relation to the Evergreen Study because we did the study in 2008, even longer than I thought ago, and there were issues. Again, I don't know if you want to move on to that.
- Councilor Bushee said, "Just back to the cost savings, since we've already spent this cost savings, so it's not new cost savings, do you anticipate more cost savings due to some of these raises that perhaps we haven't spoken of, or is this all you would consider as cost savings."
 - Mr. Snyder said this is just a sample of 9 people that we pulled out of this analysis that was done. I anticipate there to be more cost savings than this worked into the current fiscal year budget, but this is just an example, and why it's labeled as a sample of 9 positions.
- Councilor Bushee would like, at some point, to have an agenda item dealing with cost savings due to vacancy savings or double billing of positions.
 - Mr. Snyder said yes, we can do this.
- Councilor Bushee said, "I think it's important, given that we've been told we're going to be in a big operational hole, to begin to see how we're going to fill that hole, so if this part of the effort to do that, I'd like to know. For a while when we were going through the budget, at least with Robert, any new filling of any positions were contemplated by the Governing Body. I raised that issue. And then I raised that issue in relationship to criteria with regard to raises, to some extent, unless there is a very clear personnel policy decision, I think it's something that we should possibly contemplate."
- Councilor Rivera said, "In looking at the budget savings page, the 9 persons, there was \$905,892 in potential savings if those positions stay open for a year. You said that money was not available to us, it was being used to balance the current budget."
 - Mr. Snyder said that is worked into the vacancy savings for the current fiscal year budget, so in essence it is used. It is assumed we're going to have that vacancy savings, and I believe the vacancy savings is 4% is what was worked into the last fiscal year budget. These are 9 positions, and the \$900,500 is not 4%, so there is leeway, so if a position would need to be filled, somebody retires and we need to fill two positions rather than 1, for example, then we have that flexibility, but our goal is to try to stay within that vacancy savings."

- Councilor Rivera said in March there will be a new Mayor, and either he or she is going to want to fill these positions, and I assume all these people are acting or interim because of that. His assumption is that all these people would go back to their previous position.
 - Mr. Snyder said, "That is correct. The last held position, and in some cases, some of those last held positions were doing multiple jobs as well, 2 or 3 jobs as well."
- Councilor Rivera said that means the directors would be filled by full time or exempt employees appointed by the City Manager and the Mayor.
 - Mr. Snyder said that is correct.
- Councilor Rivera said then we could potentially be several hundred thousands in the hole to start out, because the savings is no longer there.
 - Mr. Snyder said the \$900,500 could go down in cost savings, yes.
- Councilor Rivera said in looking ahead to the next fiscal year, we could be in the hole to start out.
 - Mr. Snyder said, "It would create more of a challenge. The other side is, each of these people could go back into the same roles and then we still would have the \$900,500 in savings, or somebody somewhere else in the City could be doing multiple roles. This is only an example of 9 positions, so I would hate to say, based on this small.... out of 1,580 positions in the City I would have to use these 9 positions as an example of the whole City. I understand what you're saying, and the likelihood is that \$900,500 could be \$700,000 or \$600,000, something less, but as you look at the whole City it may all balance out based on the fifteen hundred or so other positions."
- Chair Dominguez asked Ms. Perez is she has all the requests for information, noting one of them
 is what the promotion was for Mark Allen. He asked Geno if we crossed any lines. All in the spirit
 of transparency. Are you okay with some of the direction we've given.
 - Ms. Perez said she believes so, but if she has questions she won't hesitate to call and ask for clarification. She said Councilors for questions can call either her or Chairman Dominguez.

31. UPDATE ON EVERGREEN COMPACTION STUDY. (SANDI PEREZ)

A Memorandum dated October 21, 2013, to the Finance Committee, from Sandra K. Perez, Interim HR Director, regarding Update -- Evergreen Classification/Compensation Study, prepared by Ms. Perez, is incorporated herewith to these minutes as Exhibit "8."

Chair Dominguez asked if there is anything glaring we need to know.

Ms. Perez reviewed the information in Exhibit "8." Please see Exhibit "8" for specifics of this presentation.

Councilor Bushee asked about the cost.

Ms. Perez said, "I don't know. I could take a hand at trying to roll those numbers forward, but I'll be honest, I've looked at this packet of the study that was here and I have real questions about how some of those costs were derived, particularly in the consolidation of two different pay structures with completely different pay rules, inequities and equity issues, across the board on how those come together. I think it's a low-balled cost, from my cheap seat, but I wasn't here at the time, so I don't know how it was derived. I'm surprised it wasn't a lot higher, considering the detail they wanted to accomplish with it."

Councilor Bushee asked why they felt it was important to do.

Ms. Perez said one of the things they mentioned was "trying to return to and establish a true merit based pay system, which is more pay for performance." She said to do this you have to start with a consolidated structure, commenting it is difficult to do it in two different structures.

Councilor Bushee said she is interested in a gender based equity study, which she thinks is costly. She said we don't want to get into the level of how to decide what a pay grade, but we do want to know that it is fair, relieves compaction, has a policy basis, and a rational nexus as to why things are being done, or if it is cronyism. She said she isn't trying to micromanage, or meddle, but she wants to know how policy is being decided. She reiterated she wants the City to be fair, even-handed by gender, job description and such.

The Chair's remarks here are inaudible

32. OTHER FINANCIAL INFORMATION

A copy of the *Proposed Gross Receipts (Hold Harmless Revenue Replacement)* HB-461 Cash 2014 All, provided by Marcos Tapia, is incorporated herewith to these minutes as Exhibit "9."

A Memorandum dated October 10, 2013, with attachments, to the Finance Committee, from Marcos A. Tapia, Finance Director, regarding Gross Receipts and Lodgers' Tax Reports, is incorporated herewith to these minutes as Exhibit "10."

A. UPDATE OF GROSS RECEIPTS TAX REPORT RECEIVED IN OCTOBER 2013 (FOR AUGUST 2013 ACTIVITY) AND LODGERS' TAX REPORT RECEIVED IN OCTOBER 2013 (FOR SEPTEMBER 2013 ACTIVITY). (MARCOS A. TAPIA)

Mr. Tapia said this is a huge increase over the last year at this time. He said because of the federal shut-down the next two months will definitely show those trends. He said the receipts are up more than \$2 million over last year at this time.

33. MATTERS FROM THE COMMITTEE

Councilor Calvert said we talked about the status of collections at the last meeting, and asked that to be put on the agenda. He said he believes we need to have that discussion and to restart that process.

Chair Dominguez noted that Councilor Ives is to be listed as excused for this meeting

34. ADJOURN

There was no further business to come before the Committee, and the meeting was adjourned at 8:45 p.m.

memo

DATE:

October 18, 2013

TO:

Finance Committee and Public Utilities Committee

FROM:

Cindy Padilla, Director

Environmental Services Division

VIA:

Nick Schiavo, Public Utilities and Water Division Director

Item & Issue:

Recommended amendments to the Professional Services Agreement with Reunity Resources for services for a pilot program for food waste separation, collection and composting.

Background & Summary:

The Environmental Services Division has recommended that the Governing Body of the City of Santa Fe approve a professional services agreement between the City of Santa Fe and Reunity Resources. This agreement is before the Finance Committee October 21, 2013. We are requesting the following amendments be considered for approval (underlined information to be *inserted*, strikethrough to be *deleted*):

Page 1:

Scope of Work: Objectives:

Create nutrient rich compost to help replenish depleted soils – to be done at the compost facility

Provide compost to local growers – to be completed by the compost facility

Item # 6. Provide weekly monthly reports; /compost created

Page 2:

COMPENSATION

Ephibit "2"

C. The City will provide 64 gallon containers for use in his pilot program at a cost of \$1.00 per year (not to exceed 150 180 containers). This quantity will be reviewed by both parties at midterm to determine adequacy and possible increase in quantity. The City will maintain ownership of the containers upon completion of the pilot program. Containers must be returned in adequate condition for reuse, with reasonable consideration for normal wear and tear and broken carts.

Page 3

This Agreement shall be effective when signed by the City and terminate on November 30, 2014, with the option to renew <u>upon mutual consent of both parties</u>, up to three additional years, or unless terminated sooner pursuant to Article 6 below.

<u>6. TERMINATION</u>

A. This Agreement may be terminated by the City upon 60 30-days written notice to the contractor with 30 day opportunity for the Contractor to clear any deficit.

Page 4

The Contractor warrants that it presently has not interest and shall not acquire any interest, direct or indirect, which would <u>materially in any manner or degree</u> with the performance of services required under this Agreement. Contractor further agrees that in the performance of this Agreement no persons having any such interests shall be employed.

Action Requested

Approval of the Professional Services Agreement with Reunity Resources for services for a pilot program for food waste separation, collection and composting, with the above suggested amendments. Thank you.

Raymond J. Rael Chief of Police

RE:

Benefits of 5/8 hour shifts as opposed to 4/10 hour shifts

In late 2010 it became evident that the Santa Fe Police Department was unable to maintain minimum staffing levels on patrol shifts, and that the overtime budget was being heavily impacted by the need to call in off-duty personnel at time and one half pay, just to meet minimum staffing levels. It also became apparent that due to manpower shortages, the Department was unable to focus resources on addressing dramatic increases in property crimes. In fact, the number of property crimes had risen so dramatically that the City of Santa Fe was rated as having the second highest property crime rate in the nation according to Federal Bureau of Investigation (FBI) statistics.

Given the situation, then Chief Aric Wheeler, conducted an analysis of the department's work schedules in an effort to identify the most efficient scheduling and reduce overtime. The evaluation determined that while four (4) ten hour shifts were popular with staff because it allows three (3) days off, that the two (2) most efficient work schedules for police operations are:

- 1. The five (5) eight hour shift schedule traditionally used by law enforcement
- 2. Or, twelve (12) hour shift schedules with rotating days off

On identifying the most efficient work schedule, Chief Wheeler began implementation of a change in work schedules and notified the Santa Fe Police Officers Association (SFPOA) of his intent to change the work schedule in accordance with the City of Santa Fe/SFPOA collective bargaining agreement. The collective bargaining agreement sets the department's work schedule as being either five (5) eight hour days or four (4) ten hour shifts, to be determined by the Chief of Police. In any case, the SFPOA objected to considering the twelve hour shifts citing concerns of exhaustion on the part of officers working a 12-hour schedule. Chief Wheeler then began moving toward implementing the five (5) eight (8) hour work schedule but stepped down prior to full implementation in late March 2011.

SS001.PM5 - 7/95

Following my appointment as Interim Chief of Police on March 23, 2011 I directed a second analysis of the shift schedules to verify the accuracy of the previous analysis and came to the same conclusions. As such, notification was given to the SFPOA that the five (8) hour schedule was to be implemented. In response, the SFPOA filed a grievance objecting to a change in work schedules which went to arbitration. The arbitration ruling sustained the Chief's ability to implement changes in shift schedules and concluded that the language contained in the contract recognized the five (5) eight hour work schedule as legitimate and within the parameters of the agreement. The SFPOA responded by appealing the arbitrators decision to State District Court where the results of the arbitrator's findings were upheld. The change in shift schedule was subsequently implemented in June 2011.

Since the implementation of the five (5) eight (8) work schedule, the department has succeeded in achieving the following results:

- Field 29.63% more officers in a twenty four (24) hour period (based on minimum staffing levels).
- Establish overlap periods during high call volume periods to better service calls.
- Increase the total number of hours worked by Officers in the Patrol division from 147,427.63
 under the four (4) ten (10) shift to 149,079.29 for an increase of 1,651.66 hours (the equivalent
 of 1.02 extra officers).
- Reduce overtime expenditures by 11% for the year after being implemented for a savings of approximately 106,000.00.
- And, most importantly the shift schedule change has allowed the department to focus on
 property crimes with on-duty personnel and personnel on overtime to conduct targeted patrols
 that have reduced the numbers of property crimes by 38% from previous years.

In summary, the data compiled since the implementation of the five (5) eight (8) hour work schedule clearly shows that the department has become more efficient and effective in the use of available manpower, the expenditure of fiscal resources, and in our ability to focus on burglary prevention and the apprehension of the perpetrators of property crimes.

City of Santa Fe, New Mexico

memo

DATE:

October 8, 2013

TO:

The Finance Committees

FROM:

Robert Rodarte, Purchasing Director

Judith Amer, Assistant City Attorney

SUBJECT:

Amendments to Section 29 of the Purchasing Manual to delete requirement for City

Council approval for increases in compensation that are more than 10% of the original contract amount and other non-substantive changes to Section 29.9

ISSUE & BACKGROUND

On October 7, 2013, the Public Works Committee approved, with some clarification points recommended and made, the above referenced Amendment to Section 29 of the Purchasing Manual.

Currently the Purchasing Manual, Section 29 requires City Council approval of contract modifications that increase the compensation over 10% of the original contract even if the contract modification is an amount less than \$50,000. For example, an \$11,000 amendment of a \$100,000 contract, under the current Purchasing Manual, would need to go to City Council for approval because it exceeds 10% of the original contract amount even though the City Manager can approve contracts under \$50,000. These Amendments would correct that situation and only require City Council approval when the cumulative amendments exceed \$50,000 and allow the City Manager to approve cumulative increases in compensation under \$50,000 in all cases even if it exceeds 10% of the original contract.

RECOMMENDED ACTION:

Approve the Amendment to avoid situations where cumulative increases in compensation of all prior amendments which total under \$50,000 would only be required to have City Manager approval and avoid situations where the 10% rule caused an under \$50,000 amendment to go to committees and Council for approval.

29. Contract Modification/Amendment.

Modification/<u>Amendment</u> of terms and conditions and contract renewal may be allowed with <u>a written</u> the agreement of both parties.

The following is a list of what is included in the term "contract modification/amendment" and is covered by this Section 29.

a. A change order in a construction confract

A term extension or decrease in length of the term

A scope of work and compensation modification, including, an increase or decrease of compensation or any type of change in the scope of work. Note that amendments to contracts procured by the competitive sealed proposals process must not substantially deviate from the specifications of the original competitive sealed bid or request for proposal upon which the contract was awarded. An amendment to the original contract inconsistent with the intent of the original REP is not appropriate. See, 29.9.1

d. An update a "name change" of the same vendor (not a "new vendor"); or

All Contract modifications must be accomplished by amendment of the contract in writing, signed by all the parties.

All Contract amendments/modifications and contract renewals

require <u>City Attorney</u>, <u>City Clerk and City Finance Director approval plus, depending on the rules set forth below, appropriate committee(s) and City Council approval or City Manager. if either the scope of work or the compensation is amended.</u>

The contract amendment must include references to the provisions to be modified, and must contain the entire provision as modified.

29.9.1 Modification/Amendment of Scope of Work.

29.9.1 As stated above. As change in the scope of the work may require a new-competitive sealed bid or proposal, if it substantially deviates from the original competitive sealed bid or request for proposal, based on the determination of the Purchasing Director. It is realized that what constitutes a change in the scope of the work is a judgement call. There is no maximum contract amendment level however, the intent of the City to encourage competitive procurement should always be a significant factor. In some instances, a contract amendment may be considered sole source or emergency procurement at the written determination of the Purchasing Director. Bids, requests for proposals and contracts should be carefully planned, reviewed and executed to cover the

anticipated scope of the project. If the amendment is verging on a change in the scope of the work, the Purchasing Director should be contacted by the using department.

29.9.2 Approval Procedure for Medifications/Amendments/Change Orders

During the term of the contract. Asny modification/amendment/ change order in the scope of work that results in additional compensation up to an additional cumulative amougt of \$50,000, or 10% of the contract price, whichever is less, shall requires review and only approval by the using department director, the Finance Department Director, the City Attorney's Office and the City Manager.

<u>During the term of the contract, Aany medification/amendment/change order in the scope of work that results in additional compensation over a cumulative amount of \$50,000, shall requires appropriate committee(s) and City Council approval.</u>

The only exception to the above is that at any time during the term of the contract. If the cumulative modification \$50,000 threshold has been reached and the City Manager determines that a change order/modification/amendment is infiniediately necessary and in the best interest of the City, the City Manager can approve a change order/modification/amendment and then seek City Council ratification within three months.

Department of Justice

Office of Justice Programs

FOR IMMEDIATE RELEASE January 26, 2012

Office of Justice Programs (OJP) (202) 307-0703 www.ojp.gov

USDOJ STUDIES OFFICER WELLNESS AND WORK SHIFTS

Shift length most beneficial to officers may also offer cost savings

WASHINGTON - The Department of Justice's Office of Justice Programs (OJP) today announced findings from two studies examining law enforcement officer wellness. Funded through OJP's National Institute of Justice, the studies look at sleep disorders among law enforcement officers and the impact of shift length on officer wellness.

The Shift Length Experiment: What We Know About 8-, 10-, and 12- Hour Shifts in Policing found that 10-hour shifts offered numerous benefits over the traditionally used 8-hour shifts: officers get more sleep, work less overtime, and report a significantly higher quality of work life. This report is released concurrently with a related study, Sleep Disorders, Health, and Safety in Police Officers, which shows that sleep disorders, typically associated with poor health, performance, and safety outcomes, are prevalent among police officers.

Summary of Findings:

In *The Shift Length Experiment: What We Know About 8-, 10-, and 12- Hour Shifts in Policing*, researchers at the Police Foundation studied officers from two departments from different regions of the country and with different demographic composition: Detroit, Michigan and Arlington, Texas. The researchers found that officers working 10-hour shifts got more sleep than officers who worked the traditionally used 8-hour shifts. The 10-hour shift offered several benefits not associated with 8-hour shifts, while 12-hour shifts had some disadvantages.

Notably, officers working the 10-hour shift worked the least overtime of the three shift schedules. These reduced levels of overtime suggest the possibility of cost savings for agencies that use compressed schedules.

Additional study findings supporting 10-hour shifts include:

- Officers working 12-hour shifts reported greater levels of sleepiness and lower levels of alertness than those assigned to 8-hour shifts.
- Officers working 10-hour shifts reported significantly higher quality of work life than those on 8-hour shifts. No quality of work benefits came from the 12-hour shifts.
- There is no significant difference on actual work performance among the three shift lengths.

The full report is available at www.policefoundation.org/shiftexperiment/.

Efhilit "4"

In Sleep Disorders, Health, and Safety in Police Officers, researchers at the Brigham and Women's Hospital gathered data on sleep disorders, health, and performance from nearly 5000 police officers in North America over a period of two years. The study showed that about 40 percent of police officers screened positive for sleep disorders – at least double the estimated 15 to 20 percent rate of sleep disorders seen in the general population. If untreated, sleep disorders can have adverse health and safety affects, which could ultimately pose a risk to the public.

The most common sleep disorder – likely to affect 33 percent of officers screened - was obstructive sleep apnea (OSA), a condition where the airway becomes narrowed or blocked during sleep. Excessive sleepiness affected 28.5 percent and moderate to severe insomnia affected 6.5 percent of officers surveyed. Overall, police officers who were identified as having a sleep disorder were also more likely to have physical and mental health conditions.

During a two-year follow-up, officers with sleep disorders had a higher risk of falling asleep while driving, committing an error or safety violation attributable to fatigue, and experiencing uncontrolled anger towards a suspect. These officers were also more likely to report a serious administrative error and had a higher rate of absenteeism.

An article on these findings published in the Journal of the American Medical Association is available at http://jama.ama-assn.org/content/306/23/2567.full.pdf.

###

The Office of Justice Programs, headed by Assistant Attorney General Laurie O. Robinson, provides federal leadership in developing the nation's capacity to prevent and control crime, administer justice and assist victims. OJP has six components: the Bureau of Justice Assistance, the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Office for Victims of Crime, and the Office of Sex Offender Sentencing, Monitoring, Apprehending, Registering and Tracking. More information about OJP can be found at www.ojp.gov.

10-hour shift may be best for police

Published: Jan. 29, 2012 at 12:02 AM

WASHINGTON, Jan. 28 (UPI) --

WASHINGTON, Jan. 28 (UPI) -- Two U.S. studies found 10-hour shifts may result in fewer police officers suffering from sleep disorders than those working 8-hour shifts, researchers said.

The U.S. Justice Department's Office of Justice Programs said the two studies looked at sleep disorders among law enforcement officers and the impact of shift length on officer wellness.

In one study, researchers at the Police Foundation studied officers with different demographic composition in Detroit and Arlington, Texas.

The researchers found that officers working 10-hour shifts got more sleep and had more benefits than those who worked the traditional 8-hour shifts. Twelve-hour shifts had some disadvantages, they found.

Officers working the 10-hour shift worked the least overtime of the three schedules, suggesting the 10-hour shifts might have cost savings.

Police officers who worked 12-hour shifts reported greater levels of sleepiness and lower levels of alertness than those assigned to 8-hour shifts, while officers working 10-hour shifts reported significantly higher quality of work life than those on 8-hour shifts. No quality of work benefits came from the 12-hour shifts.

There is no significant difference on actual work performance among the three shift lengths, the researchers said.

In a second study, researchers at the Brigham and Women's Hospital in Boston tracked nearly 5,000 police officers in North America for two years. The study found 40 percent screened positive for sleep disorders -- at least double the estimated 15 percent to 20 percent seen in the general population.

The findings were published in the Journal of the American Medical Association.

An Experimental Study of Compressed Work Schedules in Policing: Advantages and Disadvantages of Various Shift Lengths

K. L. Amendola, D. Weisburd, E. Hamilton, G. Jones & M. Slipka Journal of Experimental Criminology, Volume 7, Issue 4, pp 407-422 www.policefoundation.org/shiftexperiment/

BACKGROUND

Compressed work week (CWW) schedules are defined as shifts where the work day is extended longer than the normal 8 hour shift; however the numbers of days in the work week are reduced. Research in other professions has resulted in mixed findings related to the extent to which CWWs impact performance and other outcomes. Past research has shown that when relying on objective measures, performance may not be impacted by shift length. However, subjective evaluations for employees regarding CWWs tend to be more positive. While studies in policing have generally shown that officers are more pleased with CWWs, there are some indications of increases in fatigue and stress for longer (12-hour, but not 10-hour) shifts. Since policing is a "high risk" work environment that directly affects the lives of those in their community it is important to evaluate the effects of CWWs on officers. This study examines the impact of three shifts (8-hr, 10-hr, and 12-hr) on performance, health, safety, quality of life, sleep, fatigue, alertness, off-duty employment and overtime.

METHODS

This study, conducted between 2007 and 2009 is the first known, comprehensive randomized experiment on CWWs in police organizations. Only agencies who had not adopted compressed schedules were asked to participate to avoid any confounding factors with agencies in the process of change and those that already implemented compressed shift schedules. The researchers studied two U.S. police departments for a period of 6 months. In order to adjust for site and shift variability, they used a randomized block design in which they blocked for two controls: the site of police department and the time of day the shifts were scheduled. Researchers went around to all precincts and recruited officers to volunteer and then randomly assigned officers to different shifts (preference and seniority were not factors here). Scientists used the "assessment center approach" for administering performance measures. Data collected for the study included agency provided information (e.g. self-initiated activity data), various work simulations to assess performance: in fitness, driving, shooting and reaction times; behavioral assessment instruments as well as self report instruments. The measures were then organized in our five constructs: work performance and safety, health and stress, quality of life, sleep/fatigue/alertness and sleep disorders, and finally overtime and off duty employment.

FINDINGS

The analysis revealed no significant differences across shifts for work performance and safety, health, quality of personal life, sleep quality, sleep disorders, and fatigue when comparing 8-, 10- and 12-hour shifts. However there were significant findings with regard to quality of work life, alertness, sleepiness, and overtime. Quality of work life was lowest in 8 hour shift workers and highest with those working 10 hour shifts. Also in terms of sleep, the officers on the 10 hour shift obtained the most sleep as compared to officers on both 8 hour and 12 hour shifts. With regard to

sleepiness, officers on 12 hour shifts reported higher levels than those on 8 hour shifts. Finally there was a significant finding that the alertness of 12 hour shift officers was lower than that of 8 hour shift officers but did not significantly differ from officers working a 10 hour shift. For overtime, officers on 8-hour shifts worked at least three times as many overtime hours as those on 12 hour shifts, and five times as many as those on 10 hour shifts.

POLICY IMPLICATIONS

This study indicates that compressed work week schedules do not negatively affect routine performance or health of police practitioners. However, the study also indicates disadvantages of standardized 8 hour days/5 days a week schedules in comparison to CWW shifts. The findings suggest that a 10 hour shift is optimal for police officers' quality of life, sleep and overtime. Ten hour shifts allow the officer to have a higher quality of work life, greater amounts of sleep and finally less overtime. Perhaps the last finding is the most significant in terms of police departments implementing compressed work week schedules. In a time of budget cuts and cost analysis of each department, the potential savings for agencies by cutting overtime could be substantial by converting to CWW schedule. As organizations strive to become more effective and efficient, this experiment provides scientific data supporting the movement towards 10 hour shift schedules; therefore allowing them to maximize quality of work life among their personnel, as well as that of the public they serve.

Police Officer Stress and Sleep Deprivation

Subject Matter Expert Interview with **Dr. John Violanti**

By

Jason Shea, M.S., MPTC Statewide Health and Wellness Coordinator

As one of the leading researchers in the field of Law Enforcement Health, Dr. John Violanti's name can be found in the author section of some of the most important studies conducted in this field. Topics ranging from endothelial function and sleep deprivation to post traumatic stress and mortality rates, Dr. Violanti is a true pioneer in study of officer health and wellness. Currently serving as a research professor in the Department of Social and Preventive Medicine at the State University of New York Buffalo, he draws upon his 23 years of experience as a New York State Police trooper to provide a practical approach to his prospective research projects. A national lecturer, he has been asked to speak at esteemed venues including the FBI Academy at Quantico, Virginia and various symposiums on Law Enforcement health.

Along with his significant research, Dr. Violanti has also written and edited several books on stress and trauma in the police profession, including Police Trauma: Psychological Aftermath of Civilian Combat, Posttraumatic Stress Intervention: Challenge, Issues, and Perspectives, and Copicide: Concepts, Cases and Controversies of Suicide by Cop. Dr. Violanti's body of work speaks for itself. The MPTC is proud to have the opportunity to share his expert insight with the Law Enforcement community around globe.

Dr. Violanti, your research on mortality rates in police officers back in 1996 found that the average lifespan of a police officer is 66 years. Have you seen any changes in this as of 2012?

Previous research has suggested that police officers are dying sooner than their same age civilian counterparts. For example, police officers at the age of 50 are dying sooner than their 50 year old civilian counterparts.

What do you feel are the top 5 factors associated with the declining health of law enforcement professionals?

- Stress
- Lack of physical fitness

- Diet
- Shift work
- · Difficulty transitioning from work to personal life

You have done quite a bit of research on how stress affects the overall health of police officers. Can you provide us with some of your findings?

Stress can lead to a disruption in the HPA axis. The HPA axis is the hypothalamic-pituitary-adrenal axis, is one of the major bodily systems generally responsible for responding to stress. We are also presently looking into whether or not PTSD (post-traumatic stress disorder) alters heart rate variability, with a decrease in the ability to vary heart rate. Here, the parasympathetic nervous system is not allowed to counteract the effects of the sympathetic nervous system. With stress, we have also seen a disregulation in daily cortisol patterns. This may leave the police officer more vulnerable to disease. Excessive cortisol secretion which does not return to a normal level can also lead to a state of hypervigilance.

In your research, have you seen other health problems associated or caused by chronically elevated or altered cortisol patterns?

We have found a decrease in the flexibility of the brachial artery in police officers with elevated stress levels. In fact there is a 2X greater risk of impaired brachial artery flow in police officers with higher PTSD symptoms. We have also found a thickening of the Carotid artery. These are both major risk factors of plaque build-up, cardiovascular disease and stroke.

Have you found any other physiological symptoms associated with PTSD?

Stress that originated from police organizational pressure and lack of support at work are two of the major risk factors associated with the symptoms of PTSD.

PTSD is both a physiological and psychological disorder. PTSD can cause destruction of the cells in the hippocampus area of the brain. There is a decreased blood flow to parts of the brain leading to the inability to extinguish bad memories of the traumatic event.

There have been numerous studies on shift work, sleep deprivation, and related health decline. Can you share what you have found in your research?

Shift work and sleep deprivation individuals have been associated with 4X greater risk of metabolic syndrome. This combined with elevated stress levels associated with police work can lead to inflammation in arteries, which in turn can lead to cardiovascular disease.

There is a negative hormonal cascade associated with shift work and sleep deprivation. Individuals who work night shifts have a diminished cortisol response. The disruption in eating patterns associated with shift work can also be a lifestyle risk factor which increases the risk of metabolic syndrome. We also found a 4-fold increase in injury rate for night shift workers. Not only is the risk for cardiovascular disease greater in night shift workers, but the risk of getting seriously injured is also magnified.

Do you have any recommendations on how a police officer working the night shift may curb the potential for these serious health risks?

- National Institute of Justice recommends 10 hour fixed shifts are best
- Limit second jobs and allow time for physical and mental recovery
- Controlled napping during shifts
- Eat a high protein meal just prior to shift. This energizes hormonal systems.
- Exercise prior to shift. This also energizes hormonal systems.
- · Get quality sleep prior to shift.
- Departments need to change the culture and educate on proper sleeping habits.

What do you feel are some of causes of the declining health over a police officer's career?

When a police cadet graduates an academy they are typically idealistic young officers who are also fit. They are then exposed to police culture and the associated stresses. As one's career progresses there is a general drop in physical and mental fitness. At older age categories there may be complete or near complete cessation of physical fitness, leading to the prevalence of obesity and metabolic risk factors among officers.

If you were a Wellness coordinator, what would you do to increase the overall health of the Law Enforcement community?

Many departments have adopted wellness programs. Some have succeeded, while others have not. Education of both the individual and department as a whole is critical. Creating a healthy culture can have profoundly positive effects across a department. Educating officers on the importance of sleep, diet, stress management, physical fitness, and social network/relationships should be a priority in any wellness program. Let officers know that it is OK to be human.

You mentioned physical fitness. Do you have any recommendations regarding training?

The best training advice I can give is to make sure the training is age appropriate and tailored toward the individual. This will help to ensure that officers will stay with a program. Physical fitness is a lifetime habit.

Do you have any clinical pearls from your research that you could share with us?

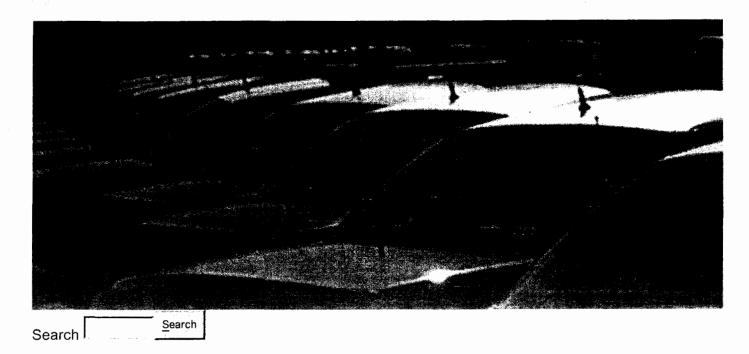

We are currently researching if vitamin D deficiency can lead to increased risk of cardiovascular risk factors. Other research has suggested that natural vitamin D from sunlight is superior to synthetic form. We are also going to conduct imaging of the eye to assess plaque build-up in the very thin vessels in the human eye. This can be a sign of future cardiovascular disease.

Dr. Violanti, thank you for both your time and insight. It has been an honor.

It has been my pleasure.

10-Hour Shifts: Expensive Luxury, or Effective Deployment?

Posted on May 10, 2012 by Corona Solutions

Download the full article here: http://coronasolutions.com/resources/whitepapers.shtml

Long a favorite of shift workers, the 10-hour shift has also frequently been the subject of management complaints about the difficulty of matching on-duty staffing to workload over the 24-hour day and seven-day week. A recent report from the Police Foundation titled The Shift Length Experiment (http://policefoundation.org/indexShiftExperiment.html) has added new empirical evidence to support the staff preferences, but the challenge remains to justify the schedule. We will answer that challenge here.

In order to cover the 24-hour day with 8-hour shifts there must be at least three shifts per day starting eight hours apart. Given that workload varies continuously during the day, and given that with this plan the on-duty staffing can change no more than three times per day, then there must be periods of time when the staffing level is either above or below the demand.

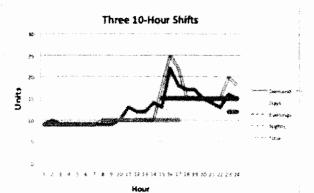

This is a simplified chart of a 24-hour period

with three standard 8-hour shifts. Even though the staffing for each shift is optimized to match the demand, there are very few times when the staffing matches the demand. The day shift (0700-1500) is overstaffed at the beginning then significantly understaffed by the end. The evening shift (1500-2300) is seriously understaffed at the beginning, but then overstaffed later. The night shift (2300-0700), like the evening shift, is understaffed at the beginning, and then slightly overstaffed later on.

For this demand profile the obvious resolution would be to add an overlapping, or "cover" shift during the busy periods. However, doing so would not only place more staff than necessary on duty during several hours of that overlap, it would take staff away from other hours when they are needed more.

The 10-hour shift offers one resolution to this problem. Because there are at least 30 shift-hours scheduled per day (3 shifts * 10 hours) there are six hours per day that can be used for overlap(s) during busy times. The six hours of overlap do not have to be consecutive. For example, in the below chart the Day shift works from 0700-1700, the Evening shift

works from 1400-2400, and the Night shift works from 2200-0800. This yields overlaps between 1400-1700 and 2200-2400 which are peak demand periods for this agency. On this chart, note how the total on-duty units closely follows the demand profile. This not only improves efficiency, it also improves officer safety.

A further benefit of the 10-hour plan is that one shift does not end just as the next one begins. Followed strictly on an 8-hour plan there is the strong possibility that no units would be on the street, in their beats, and available to respond to calls that come in at shift change. Most 10-hour plans have at least a one-hour overlap as one shift ends and the next begins. This gives the officers time to fuel their cars, return to the station and complete paperwork without incurring overtime and without leaving the beats unstaffed. For the oncoming shift, there is time for a briefing, preparing the vehicle, and driving to the beat, available for calls.

The Hidden 7% Bonus

Officers on a 10-hour plan work four shifts per week; those on an 8-hour plan work five. Typically, a police shift begins with a briefing or roll call consuming about 30 minutes before the officer is on the street and ready for calls. There is one hour of breaks during the shift, then the last 30 minutes are consumed by paperwork and other end-of-shift activities. All together two hours out of each shift is lost to active patrol work. For a four-day week, that is eight hours; for a five-day week it is ten. The net gain in patrol time is nearly seven percent. That may not sound like much, but consider if you have 100 patrol officers this is the equivalent of adding seven more at no cost.

Happier and Healthier Cops

According to the Shift Length Experiment* staff working four 10-hour shifts "averaged significantly more sleep and reported experiencing a better quality of work life than did their peers working 8-hour shifts. And officers working 12-hour shifts experienced greater levels of sleepiness (subjective measure of fatigue) and lower levels of alertness than those assigned to 8-hour shifts. Importantly, those on 8-hour shifts averaged significantly less sleep per 24-hour period and worked significantly more overtime hours than those on 10- or 12-hour shifts" (abstract p. iv).

Having at least a portion of the weekend off is one of the chief interests we find when we work with agencies across North America. For most agencies, Friday and Saturday nights

are busy times for police work, so there is a built-in conflict. 10-hour, 4-day schedules tend to make it more likely that each officer will regularly have at least part of the weekend off.

Most officers commute to work, and driving four times per week is naturally 20% less costly not only in travel expenses, but also in time.

Overall, it appears that 10-hour shifts are beneficial to the officers, management and the community. The essential step in implementing and managing a 10-hour plan is the analysis and optimization. Corona Solutions' Ops Force Deploy provides schedule optimization to any agency that chooses to participate.

*The Shift Length Experiment, Amendola, Karen L, Police Foundation, 2011. (www.policefoundation.org/shiftexperiment)

About the author, Dale Harris:

Prior to co-founding Corona Solutions, Dale worked in law enforcement for 22 years as a sworn officer then as a crime analyst. For most of his career he was responsible for operations analysis and scheduling for his department.

Brownsville police start 10-hour, 4-day work week

By MADELINE BUCKLEY/The Brownsville Herald | Posted: Monday, February 20, 2012 12:00 am

The Brownsville police department has shifted its patrol division to a new work schedule that increases the hours in the workday but then gives the officers a three-day weekend – a move officials say cuts down on overtime costs and increases police presence on the street.

In mid-January, the department switched from scheduling patrol officers to work eight hours a day, five days a week to 10 hours a day for four days of the week.

Brownsville Police Commander James Paschall said the "four-ten" plan alters the schedule so that the shifts now overlap, allowing officers to usually leave for the day after their scheduled 10-hour shift. Before, when working in non-overlapping shifts, officers often put in overtime to tie up reports related to calls late in the shift.

"This seems to work," Paschall said.

In the first two weeks it was implemented, the schedule cut costs by 60 percent, he said.

The change now schedules patrol officers in four shifts that overlap, rather than three shifts stacked back to back, which Paschall said increases the number of officers on the streets during the busiest hours for policing, much needed for the force which he said is stretched thin with budget constraints due to the struggling economy.

"We just have to learn to manage the personnel we have," he said. "There is no way we can afford to hire more officers."

With financial and health concerns in mind, a committee within the department began researching different schedules last year, visiting the police departments of Waco, Killeen, Victoria and other similarly-sized cities that implemented alternative schedules.

Paschall said the department considered two alternatives: the four-ten plan that it eventually used and a schedule in which officers worked 12-hour days three to four days a week.

Concerned with fatigue, Paschall said the committee ruled out the 12-hour day.

"But officers were already putting in 10 hours with holdover calls so it's not much of a change," Paschall said.

Experts said while sleep and a lack of fatigue is crucial to officers' performance on the job, a switch from an eight-hour shift to a 10-hour shift likely wouldn't impact officers' health. Most officers interviewed said the extra weekend day allowed them to catch up on sleep and spend more time with family.

Ben Brown, a criminal justice professor at the University of Texas at Brownsville, referenced a federally-funded study completed in January that indicates police forces are increasingly moving away from the traditional 8-hour shift in favor of 10 to 12-hour shifts.

In 2009, 29 percent of departments sampled scheduled officers in 8-hour shifts, down from 40 percent in 2005.

The study, funded by the National Institute of Justice, examined the effect of shift length on police performance and health and found that different shifts did not significantly affect officers' health, safety and performance.

However, the study did conclude that officers working the 10-hour shifts reported higher quality of life than those working eight or 12-hour shifts.

Dr. Lorenzo Pelly, a local doctor of internal medicine who studies sleep disorders, said professionals who work jobs that require periodically alternating day and night shifts are at high risk for sleep disorders, but said a change between an eight, 10 or 12-hour shift likely wouldn't make a difference in someone's sleep cycle.

"It might be an adaptation," Pelly said. "While they adapt it is recommended that they take a 20-minute nap before working a night shift."

In the beginning, Paschall said the department met resistance from officers about the change, most citing a concern about the longer workday. He said some also grew accustomed to receiving overtime pay, which has lessened.

The change was made in the patrol division, which is comprised of 120 officers and supervisors, though Paschall said the department is looking into implementing the new schedule in other divisions.

Brownsville police Sgt. Orlando Chavez said his new schedule allows him to spend an extra day off each week with his family, though he said it took time for the officers to adjust to the longer day.

"My wife stays at home," Chavez said. "So for me personally a whole day off is good."

Officer Cecilia Casanova said once she adjusted to the longer day, she grew to love the three-day weekends as they allowed her to come back to work for the week refreshed.

"Actually, the three days are awesome," she said.

Officer Raul Cazares said the most difficult part of transition to the new schedule was getting used to the possibility of working an extra graveyard shift. Under the previous schedule, he said, officers could be scheduled every six weeks for one of three shifts, and two were mostly during daylight hours. Now with four potential shifts, two span throughout the night, he said.

Yet he said the longer weekend helps him stay alert.

Lt. Juan Hernandez said the new schedule offers added officers during busy hours, though sometimes leaves the patrol division stretched thin at certain hours.

"I like it. It's giving us added manpower during peak hours," he said.

Do Police Departments Save Money By Making Officers Work Longer?

BY: Caroline Cournoyer | February 7, 2012

Not eight, not 12, but ten-hour shifts are the best if police departments want to reduce their overtime expenses and improve their officers' quality of life, according to a recent study from the Police Foundation.

The Shift Length Experiment: What We Know About 8-, 10-, and 12-Hour Shifts in Policing examines the impact of working hours on officers' performance, health, safety, quality of life and overtime. Researchers used the Detroit and Arlington, Texas, police departments as case studies.

Since the recession hit, a growing number of police departments have moved to longer shifts (or compressed workweeks) to make up for smaller budgets and in some cases, smaller workforces.

But the Police Foundation's study found that 12-hour shifts are actually the worst for officer's job performance and not the best for reining in overtime costs. According to the study, officers who work for half a day, three days a week are sleepier and less alert on the job than those who work eight or ten hours at a time. The report also shows that police officers with ten-hour shifts work the least amount of overtime -- five times less than those who work eight-hours.

Cash-strapped law enforcement agencies have targeted overtime as a way to reduce overall costs in recent years - some with success, others not so much.

Just last week, the Minneapolis Police Department, which has its patrols working ten-hour shifts, announced that it paid out its lowest amount of overtime in a decade. According to the *Star Tribune*, the MPD spent \$2.8 million on overtime in 2011 when it had set aside \$5.3 million. The department may use some of the extra \$2.5 million to rehire a dozen officers, Deputy Police Chief Scott Gerlicher told KSAX-TV. MPD investigations and support staff work eight-hour shifts but are given the option to work ten, the department's public information officer, William Palmer, told *Governing*.

But the 10-hour workday isn't a perfect solution for all departments. In Glendale, Ariz., officers work 10-hour days, yet the agency is already worried about exceeding its overtime budget just seven months into the fiscal year, reports the *Arizona Republic*. That's because some cases -- like the disappearance of a local toddler and the shooting of an officer -- required extra manpower and showcase the unpredictable nature of policing.

The Answer: 10-hour Shifts

> By Ed Sanow | Editorial Director

esanow@hendonpub.com

ome of us went to it many years ago. A few of us tried it decades ago. It worked almost everywhere it was tried. That was that. Asked and answered. Well, we now have statistical proof that we were right all along. If you have been reluctant to try 10-hour shifts, the scientific evidence from a couple of rigorous case studies may persuade you to run a pilot program.

According to some exhaustive research by Police Foundation, 10-hour shifts have many documented advantages over 8-hour shifts. The benefits of 10-hour shifts do not extend to 12-hour shifts. The 12-hour shifts may impose safety risks to the officers and the public. The 8-hour shifts may be more costly than departments realize.

The 2.5-year study involved members of the police departments in Detroit, Mich. and Arlington, Texas. The entire 52-page report entitled, "The Shift Length Experiment...what we know about 8-, 10- and 12-hour shifts in policing," is available from Police Foundation. (www.policefoundation.org.)

The case studies were a direct comparison between five 8-hour-day work weeks; four 10-hour-day work weeks and three 12-hour-day work weeks. The 10-hour shifts offer advantages – both to the officer and to the department – without noted disadvantages. Those on 10-hour shifts worked the least amount of overtime of the three groups, a potential cost savings for budget plagued departments.

While it may seem some of the advantages of the 10-hour shift would carry over to the 12-hour shift, that was not the case. For example, those on the 10-hour shifts had a higher reported quality of life than those on 8-hour shifts, but those on 12-hour shifts did not.

Those officers on 12-hour shifts had "significantly" lower levels of alertness at work. They were simply sleepier and more fatigued than those on 8-hour shifts. This was not the case for those on 10-hour shifts. This alertness-sleepy issue raises very serious officer safety issues. It also raises serious liability issues for the department for problems resulting from poor judgment or actions on the part of the fatigued officer.

As for the cost to the department for overtime, those on 8-hour shifts worked an average of six hours overtime per two-

week period. This compares to an average of one hour of overtime for those on 10-hour shifts and two hours for those on 12-hour shifts.

Clearly, officer safety and department liability issues should push the work week away from 12-hour shifts, period. Reduced costs for departments (overtime), and for officers (commute) are factors that push the work week toward 10-hour shifts. The 10-hour shift allows overlapping coverage to training and peak callsfor-service periods. Of course, the 10-hour shifts also result in more days off for personal interests and family activities. Overall, the 10-hour shifts result in both improved officer job satisfaction and morale.

And that goes for officers of all ranks. Try it. If, after six months, for some reason it doesn't work for your department or division, change it back.

"Surround yourself with the best people you can find, delegate authority, and don't interfere as long as the policy you've decided upon is being carried out." — Ronald Reagan

Attorney General Holder Speaks at the National Officer Safety and Wellness Group Meeting

Washington, D.C. ~ Thursday, January 26, 2012

As prepared for delivery

Thank you, Barney [Melekian], for your kind words – and, of course, for all that you and your colleagues have done – in the COPS Office, and in conjunction with the Bureau of Justice Assistance – to help lead this Working Group, and to bring us together this morning.

I'd also like to thank Pew for hosting today's important session, and providing a forum for discussion on some of the most critical – and most urgent – challenges facing America's law enforcement community. This marks the third time that this extraordinary group of leaders, researchers, front-line practitioners, and federal partners has come together to exchange insights, to share expertise, and to strengthen the essential work that has become not just our shared priority – but our common cause.

I am honored to be included in this conversation once again, and privileged to join so many friends and colleagues in addressing – and advancing – the 16 priorities that have been identified for this Working Group – particularly reducing the rise in gunfire-related injuries and deaths, and countering premeditated and unprovoked ambush situations.

I know you have a busy afternoon ahead of you, so I'll keep my comments brief. But I would be remiss if I didn't acknowledge – and thank you for – the contributions that you have already made. Know that your time, energy, and efforts are appreciated – and that I'm counting on all of you to keep up the great work.

Especially in this time of economic challenges – when jurisdictions across the country have been called upon to confront growing demands with increasingly limited budgets – this group has an indispensible role to play. By bringing key leaders and innovators together, you help to shine a light on the most pressing threats our law enforcement officers face. By exploring innovative new strategies for combating these threats, you help agencies and departments across the country make the most of precious resources. And – by advocating for new training opportunities, pushing for improved information-sharing capabilities, and highlighting best practices, you help extend the reach of these efforts – so that every police officer, every sheriff's deputy, and every federal agent can do their job more safely and more effectively.

As we gather this morning – thanks to the committed work of public safety professionals across the country – national violent crime trends are heading in the right direction. Countless lives have been improved and saved. And so many jurisdictions – from inner cities, to rural areas and tribal communities – have begun to make important, and long overdue, strides.

We can all take pride in this. But none of us can afford to be satisfied – and this is no time to become complacent.

The unfortunate reality is that – despite measured improvements in the overall crime rate – as you've already discussed today, incidents of violence against law enforcement officers are approaching the highest levels we've seen in nearly two decades. Last year, according to statistics maintained by the National Law Enforcement Officers Memorial Fund, a total of 177 federal, state, and local law enforcement officers lost their lives in the line of duty – a 16 percent increase over 2010. Since the first of January, an additional twelve officers have been killed.

As you know better than anyone, this represents a devastating and unacceptable trend – and a cause that demands our best and most innovative efforts.

That's what this Working Group is all about. Together you have, not only tremendous expertise, but also remarkable potential. And you are strengthening current efforts to turn back the rising tide of violence we've seen. You're also helping the Justice Department do everything in our power – and use every tool at our disposal – to protect those who are on the front lines keeping our nation safe. The Department's latest efforts are guided by your leadership, bolstered by cutting-edge research – by the National Institute of Justice – and backed up by critical new programs and partnerships like those administered by Director [Denise] O'Donnell and her colleagues in the Bureau of Justice Assistance. These range from the Officer Safety and Smart Policing Initiatives, to our Bulletproof Vest Partnership – which we estimate helped save the lives of at least 16 public safety officers last year, and one since the beginning of 2012.

But all of this is only the beginning.

The Department is also building on current efforts to provide the communications tools and platforms that allow public safety professionals to share information more quickly – and to more effectively identify and combat threats. And, as we move forward, we'll continue working to reinforce the core partnerships upon which these, and so many other, important platforms and programs depend.

This means collaborating with state, local, and tribal authorities – not to mention key federal partners, private sector stakeholders, and Cabinet-level agencies – to ensure that this vital work remains a top priority. It means strengthening relationships between front-line practitioners and the U.S. Attorney community – which is why, last fall, I instructed all 94 U.S. Attorneys' offices

to meet with local law enforcement officials and work together in identifying key concerns, assessing available resources, and implementing effective solutions. To date, nearly all of these meetings have taken place, allowing us to compile critical information that has given us a clearer look at each community's most pressing needs. With this knowledge base, we're working to allocate resources more effectively – and identify the solutions necessary – to keep our law enforcement partners safe.

And it means working with key Congressional leaders to secure financial support for flagship programs like Byrne-JAG, and to maintain critical funding streams available through COPS grants – which help agencies and departments across the country close budgetary gaps and gain access to the valuable resources they need.

Of course – in the face of once-in-a-generation economic challenges, including the sharp cuts that Congress has imposed on these and other programs at the federal level – we also recognize that our ability to expand on the progress we've made will depend on more than just moving money out the door.

That's why the Department has also led the development of innovative training initiatives – such as VALOR, which I know you'll be discussing this afternoon – to help provide law enforcement leaders with the information, analysis, and cutting-edge tools they need to respond to a range of threats – including ambush-style assaults.

I am proud to report that, to date, more than 1,700 law enforcement professionals have received VALOR training, in ten regional sessions across the country. We've heard from sheriffs and police chiefs that this curriculum has been successfully put to use in the field. And some officers have described it as a "wake-up call;" both "professional and relevant;" and even "the best training [they] have ever . . . had the opportunity to experience." That's why – along with VALOR's Officer Safety Toolkit, 8,000 of which have been given out to the field – and its website, which has registered more than 1.7 million hits – we plan to keep promoting it, refining it, and expanding its availability.

At the same time, we're also taking significant steps to enhance our understanding of key factors that contribute to officer wellness – and I am proud to note that the National Institute of Justice has just released two new studies which take a closer look at a few of these factors.

One study, conducted in partnership with the Police Foundation, examined shift lengths in Detroit, Michigan and Arlington, Texas. It found that 10-hour shifts offer several benefits over 8- or 12-hour shifts – including less overtime, higher quality of work life, improved morale, and

potential cost savings – without adversely affecting performance. The second study, conducted by Brigham and Women's Hospital, gathered data on sleep disorders and officer performance and found that some 40 percent of police officers screened positive for some form of sleep disorder – at least double the rate that's been observed in the general population. It turns out that these sleep-deprived officers had a higher risk of falling asleep while driving, committing errors or safety violations, and experiencing uncontrolled anger at a suspect.

As we move forward, I'm confident that these and other important findings will enhance our ability to target areas of concern, evaluate officer wellness issues as they arise, and explore strategies for taking action. But the tragic reality is that no degree of understanding or amount of training – no matter how effective – can prevent some violent encounters from turning deadly. Because of this, the Department also has made significant investments to provide support for the families of law enforcement officers in times of tragedy.

Not including those that resulted from 9/11, last year marked the second highest number of death and disability claims received by the Public Safety Officers' Benefits Program since 1979. And I believe we can all be proud of the assistance that the PSOB has provided to so many families in moments of need.

This morning, as we reflect on these achievements – and renew our focus on the 16 core priorities that define the mission entrusted to this Working Group – it is already clear that what you've helped to accomplish – in the face of unprecedented threats and economic challenges – represents an historic step forward. As our nation's Attorney General, as a prosecutor and former judge, and as the brother of a retired police officer, I am extremely grateful for the contributions that you have made – and the recommendations you will be developing, helping to implement, and building upon in the days ahead.

As we think about and plan for the future, it's clear that a great deal of work remains before us – along with many more obstacles than we would like to see. Yet, as I look around this room today, I can't help but feel optimistic about where your efforts will help to lead us from here.

Thank you, once again, for your time, energy, and excellent work. In this work, I am proud to count each of you as a colleague and partner. Together we can – we must – create a world in which we keep safe those who do so much to protect our Nation. I am confident that we will.

FIVE THINGS

LAW ENFORCEMENT EXECUTIVES CAN DO TO MAKE A DIFFERENCE

1. Crime is rarely random; patrols shouldn't be either.

Focusing on small geographic locations and times when crimes occur and targeting specific, high-impact repeat offenders can decrease crime.

2. Quality is more important than speed.

In most cases, thorough investigations, problem solving and careful forensic evidence collection contribute more to arresting suspects than shaving a few seconds off of initial response times.

3. DNA works for property crimes, too.

Collecting and using DNA evidence substantially increases the likelihood of solving property crimes — leading to twice as many arrests and twice as many cases being accepted for prosecution than in non-DNA "traditional" investigations.

4. In police work, perceptions matter.

When people see the police as fair, lawful and respectful, officers are safer and citizens are more likely to obey the law and comply with police orders. For example, the way an officer treats a stopped motorist influences the motorist's opinion about law enforcement more than whether the officer issues a citation.

Make officer safety and wellness a priority.

Safety training, certain shift lengths and using body armor can prevent injuries and save lives. For example, the "Shift Length Experiment" study showed that officers who worked 10-hour shifts (compared to 8- and 12-hour shifts) made fewer errors and worked less overtime, saving money for the jurisdiction.

Use the Five Things to make your community and officers safer and your leadership more dynamic. Following the guidance in the Five Things will heighten your impact and lower your costs overall.

The Five Things in this flyer come from years of research, analysis, testing and evaluation.

Research in Brief: Which Shift Is Best?

By Karen Amendola, PhD, Chief Operating Officer, Division of Research, Evaluation, and Professional Service, Police Foundation, Washington, D.C.

The IACP Research Advisory Committee is proud to offer the monthly "Research in Brief" column. This column features evidence-based research summaries that highlight actionable recommendations for *Police Chief* magazine readers to consider within their own agencies. The goal of the column is to feature research that is innovative, credible, and relevant to a diverse law enforcement audience.

ew findings hold promise for agencies concerned about budgets and officer wellness. Data from a study conducted by the Police Foundation show that 10-hour shifts offer cost savings and other benefits over traditional 8-hour shifts. Officers who work traditional 8-hour shifts worked significantly more overtime—on average five times more—than officers working alternative 10-hour shifts.

In addition to saving overtime expenses, 10-hour shifts also offer other advantages, including more sleep per night and higher job satisfaction. The data come from *The Shift Length Experiment: What We Know About 8-, 10-, and 12-Hour Shift Schedules in Policing,* a publication stemming from a study funded by the National Institute of Justice. This study was the first comprehensive, randomized experiment of compressed workweeks in law enforcement. For more information, visit http://www.policefoundation.org/content/shift-length-experiment (accessed February 11, 2013).

The study was designed to test the impacts of three shift lengths (8-, 10-, and 12-hour) on performance, health, safety, quality of life, sleep, fatigue, alertness, off-duty employment, and overtime among police.

In addition to the scientifically rigorous research design and methodology, the number of measures the team used to analyze the impact of shift length makes this study one of the most comprehensive ever undertaken. The outcome measure data included departmental data, laboratory simulations and exercises, and previously validated self-report instruments. The experiment was conducted in the Detroit, Michigan; and Arlington, Texas, police departments between January 2007 and June 2009.

The Findings

Ten-hour shifts have advantages over 8-hour shifts. Ten-hour shifts appear to offer some advantages over 8-hour shifts, both individually and organizationally, with no noted disadvantages. For example, those officers working 10-hour shifts got significantly more sleep per night (more than half an hour more) than those on 8-hour shifts and had a significantly higher quality of work life. Also, those on 10-hour shifts worked the least amount of overtime of the three groups, potentially resulting in cost savings.

The benefits of 10-hour shifts do not extend to 12-hour shifts. Although it may be expected that some advantages associated with 10-hour shifts would inure to those on 12-hour shifts, researchers did not find that in this study. For example, while those on 10-hour shifts got significantly more sleep than those on 8-hour shifts, the same was not true for those on 12-hour shifts. Also, those on 10-hour shifts had a higher reported quality of work life than those on 8-hour shifts, but those on 12-hour shifts did not. While officers on 12-hour shifts worked less overtime than those on 8-hour shifts, they still worked more than those on 10-hour shifts.

Twelve-hour shifts may pose safety risks to officers and the public. While shift length did not impact safety (for example, driving and reaction time), those assigned to 12-hour shifts had significantly lower average levels of alertness at work and were more sleepy than those on 8-hour shifts—something that was not true for those on 10-hour shifts. Because some sleep scientists assert that people underestimate their fatigue levels, the latter two findings should be concerning.

Eight-hour shifts may be more costly than organizations realize. Officers assigned to 8-hour shifts worked significantly more overtime than those on 10- or 12-hour shifts. In our study, officers assigned to 8-hour shifts worked more than five times as much overtime per two-week period (5.75 hours) as those on 10-hour shifts (0.97 hours), and more than three times as much as those on 12-hour shifts (1.89 hours).

Shift length did not have a significant impact on any of our measures of performance, safety, work-family conflict, or health. Performance and safety measures such as interpersonal interactions, shooting skills, risky driving behaviors, reaction time, fatigue, and self-initiated departmental activity were not impacted by shift length.

The groups did not differ with regard to work-family conflict. During the six-month period in which officers were assigned to the experimental conditions, researchers did not detect differences across groups in terms of sick leave taken, stress experienced, increased cardiovascular problems, or gastrointestinal problems.

Conclusion

There do not appear to be any significant health, safety, or performance problems associated with compressed workweek schedules in policing. Indeed, the implementation of 10-hour shifts may be a viable alternative to traditional 8-hour shifts considering the findings of this study. The benefit of additional sleep on the 10-hour shift could potentially improve health, increase safety, and reduce sleep disorders.

It is important to note, however, that the benefits associated with 10-hour shifts did not inure to the 12-hour shifts. Although the study did not reveal any significant effects associated with objective measures of fatigue across shifts, the implementation of 12-hour shifts should be done only after careful consideration of some of the potential concerns.

Limitations of this study include lack of information regarding the methods and costs associated with implementation of compressed schedules, and the low level of reliability for driving and shooting simulation exercises. Future research should examine the impact of overtime hours on fatigue, safety, and performance and on ways to more effectively regulate hours of work in policing. •

Action Items

- Reference the full study to learn more about shift schedules in policing: https://www.ncjrs.gov/pdffiles1/nij/grants/237330.pdf (accessed February 11, 2013).
- Assess your agency's shift schedule and determine if 10-hour shifts should be implemented in your department.

Protecting our protectors

Posted on August 9, 2012 by VML Insurance Programs

The National Institute of Justice (NIJ) has released a pamphlet summarizing the science behind actions law enforcement agencies can take to improve officer safety and wellness.

The pamphlet, entitled "Protecting Our Protectors: Using Science to Improve Officer Safety and Wellness," focuses on ways officers can be safer on the streets; in use-offorce incidents; on the road; and on how they may improve their quality of life.

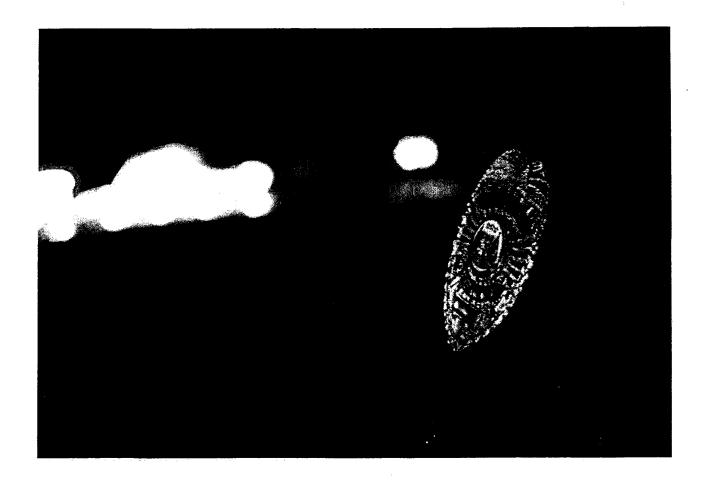

"The pamphlet focuses on how a police officer can better be physically, emotionally and mentally prepared to do the job, both on and off duty," says VML Insurance Programs (VMLIP) Law Enforcement Specialist Thomas Bullock.

It also provides statistics and panel data which points to the use of body armor, conducted energy devices, such as TASERs; and high-intensity blue lights on patrol cars and retroreflective materials on emergency vehicles as contributing to overall officer safety.

Another important recommendation in the pamphlet comes directly from results of *The Shift Length Expirement*, which found that 10-hour shifts have advantages over eight and 12 hour shifts, including:

- Less cost to police departments on overtime;
- Higher quality of work life;
- Fewer errors made by officers;
- No decrease in performance; and
- Most importantly more sleep for officers.

As *Sleep Disorders*, *Health and Safety in Police Officers* has found that police officers are twice as likely to suffer from sleep disorders, this last recommendation may be vital toward preventing accidents and injuries on the job.

"Fatigue increases the probability that officers will be involved in incidents that put themselves and their community at risk," says Bullock. "Decreased alertness can have a dramatic impact on impairing officer performance."

The NIJ is the research, development and evaluation agency of the United States Department of Justice, and is dedicated to improving knowledge and understanding of crime and justice issues through science.

For more information or to access the brochure visit the NIJ Web site.

Litigation against law enforcement continues to increase. As a result the monetary costs associated with litigation also increases. An effective risk management program can aid in identifying potential risk and liability exposures, and with identifying policy areas that could lead to litigation, citizen complaints, and liability claims.

VML Insurance Programs members with public officials liability coverage benefit from our Law Enforcement Services at no additional charge. Services include consultative services to assist in mitigation of law enforcement liability exposure, including technical assistance; liability training; in-class driver training; loss and injury analysis; policy review and assistance; off-duty identification wrist band program; and assistance with developing fitness and wellness programs.

SUBJECT:

UPDATE - EVERGREEN CLASSIFICATION/COMPENSATION STUDY

The following will outline the details, actions and current status of the Classification and Compensation Study conducted by Evergreen Solutions, LLC:

| Date Initiated | June 6, 2008 |
|--|---|
| Scope: | Conduct a comprehensive classification and |
| | compensation study for all Police, Fire, AFSCME |
| | and nonunion positions. |
| Cost of Contract | \$43,800.00 |
| Results of Study Presented to Finance | March 1, 2010 |
| Committee | |
| Recommendation – Police and Fire Pay | NO COST |
| Structure: | |
| • Pay structures remain on stand-alone | Given the negotiated step structure(s) Evergreen |
| basis and not merged with any other | did not create specific pay schedules for Police/Fire |
| pay structure. | |
| Recommendations AFSCME/nonunion: | COST: |
| 1. Consolidate AFSCME & nonunion | 1. \$51,336.00 |
| employees Pay Structure; OR | |
| 2. Consolidate Exempt/Non-exempt | 2. \$51,335.00; |
| into 1 pay structure; OR | |
| Remain Status Quo | 3. \$136,596 |
| Recommendation – Job titles & | |
| Consolidation: | |
| 1. AFSCME & nonunion positions | 1. 92 classifications – simple job title change; 76 |
| | AFSCME and nonunion titles be consolidated |
| | into 24 |
| 2. Police and Fire classifications | 2. Police or Fire Titles was recommended |
| Other Recommendations | 1. Transition to full merit-based pay system. |
| | 2. Annual mini-survey of market changes with |
| | appropriate adjustments to pay plans. |
| | 3. Conduct a comprehensive class & comp study |
| | every 5 years. |

Exhibit "8"

| Next Steps | Communication & discussion with Bargaining Units, Supervisors, Employees Determine Pay Structure Review & finalization of job descriptions Develop implementation strategy & materials Finalize pay plans & implement |
|------------------------------|---|
| Finance Committee Direction: | Start negotiations/discussions with the unions on the common structure, unified option and build into the next budget. |
| Current Status | Compensation Piece not implemented due to Costs Classification work – continues to be done as positions change, jobs are advertised, and reorganizations take place. |
